\*The figures include units maintained in Shanghai, not always with the same name, despite Japanese occupation and reported since the liberation, with the following enrollments: Hangchow-Soochow 600; Shanghai 632; St. John's 2,100; a total of 3,432.

A Brief Report on Academic Work  
Second Semester, 1945-6

General Statistics

The entrance examination for Spring term 1945-46 was given on March 13th and 14th. The total number of applicants were 269. Admitted -74. Percentage of admission-27.5%. About 2 1/2 to 1. (Please see Statistics 1)

The total enrolment for this semester is 777. For last semester-791. A slight decrease of 21. The distribution for all colleges is as follows:

College of Arts	335
College of Science and Engineering	178
College of Agriculture	121
College of Medicine	127
Union Theological College	16
	777

(Please see Statistics 2)

As a result of last semester work 126 students whose standing is slightly below level are put on probation. 15 are permanently disqualified. 31 are suspended from school for one semester. It is the earnest desire of the faculty to uphold the pre-war standard.

Courses offered this semester number 172. Last semester, 141. This small increase of 31 courses is an absolute necessity. It is a minimum and far from being adequate to cover all the necessary field required.

(Please see Statistics 4)

The total number of teaching staff for this semester is 84 with 70 as full-time and 14 as part-time. whereas for last semester, 78 with 61 full-time and 17 part-time. Part-time employment has never been found satisfactory. We like to see part-time employment eliminated as much as possible in the future. (Please see Statistics 5)

Although the great majority of our students are drawn from our Middle School and other affiliated Christian middle schools yet the figure shows about half of the number come from a variety of both public and private institutions mainly located around Canton or Hongkong.

(Please see Statistics 6)

It is but natural that a great number of our students come from districts adjacent to Canton in view of geographical proximity, linguistic affinity, and financial resources.

A Brief Report on Academic Work  
Second Semester, 1945-46

However, it is interesting to note that there are 47 students from provinces other than Kwangtung.  
(Please see Statistics 7)

United States State Department Fellowship Award

The State Department offers 25 fellowship awards to graduates of Chinese universities for a two years' study in America beginning the coming fall. The fellowship is offered on a nation-wide competitive basis. Our successful candidate is Mr. So Kwan-wai, and assistant in the department of History and Government.

Through the Chinese Agricultural Association the State Department has offered a fellowship award to Mr. Lee Wing-luk, an assistant-professor in animal husbandry to further his study in America.

Penn State College Fellowship

Miss Chan Lai-Yi has been offered an assistantship in nutrition at Penn State. She is a graduate of Lingnan. She is now on her way to the States.

China Foundation Research Subsidy

The China Foundation has contributed a sum of \$30,000 N.C. each for six professors as a subsidy to their research work undertaken this year. An additional sum of \$30,000 each has been received from the same source only recently. The recipients have shared their subsidies with other professors.

British Council Book Gifts

A gift of 55 books chiefly in agriculture and biology was sent to us by the British Council from Chungking by courtesy of the Royal Air Force. Professor Percy M. Roxby, Secretary of the Council, and Mrs. Roxby paid the university a visit not long ago. Arrangement was made that a further gift of around 60 copies of recent publications will be sent out from England to us soon.

Lingnan Trustees Chemicals Supplies

Chemicals bought before the war by the Trustees at a cost about \$550.00 Gold which were kept in New York office during the war finally came in time to meet the urgent needs of shortage.

Teachers Return

Miss C. Gower, Associate Professor of Sociology, came home in June after having been away in America for the last five years. She was repatriated from Hongkong to the States in 1942. Dr. Feng Peng-chuen, Professor of Physics, and Mrs. Feng, Assistant Professor also in Physics, were back with us last month from America. Dr. Taan Choy-tak, Assistant Professor of Mathematics, came back to China with the Fengs and has now joined the staff. Mr. Yung Kang of the oracle reputation has accepted the headship of the Chinese Department.

C O P Y

LINGNAN UNIVERSITY

Sept. 27, 1947

Miss Natalie Hankemeyer  
In charge of Public Relations  
United Service to China, Inc.  
316 Thibet Road, Shanghai

Dear Madam:

I am sorry that I have not been able to reply your inquiry of 12th inst. earlier as our statistics of student enrollment are not complete until now.

ENROLLMENT: 1058	including 38	sub-freshmen	this Fall
939	23		last Spring
1005	38		last Fall

MEN AND WOMEN: 752	men and 310	women	this Fall
656	283		last Spring
704	301		last Fall

The College of Arts and Departments of Western Literature and Education have greatest numbers of women.

TREND OF STUDENT INTERESTS: According to figures, enrollment in the College of Science and Engineering shows greatest gain (291 last Fall, 360 this Fall), that of Arts shows a slight gain (413, 424), so is Medicine (168, 172), while that of Agriculture is losing ground (122, 105). Among departments, that of Physics made biggest jump (59, 73). Next comes Engineering (111, 142), Chemistry (77, 84), Western Literature (45, 48), etc.

WARTIME HANDICAPS: Up to now over CN\$200,000,000 have been spent in the repairs of buildings and grounds. On account of high cost of materials and labor, most of the repairs done were of a temporary nature. Substantial amount is required to finish the restoration on a permanent basis. A new library building, a new laboratory building, two student dormitories and some faculty residences are urgently needed to ease the classroom and housing situation.

The campus is of such a distance from the city power station that self supply of electricity and water is necessary. Our generators were taken away by the Japanese. At present, UNRRA and CNRRA loan us a portable 75 KW Diesel Engine-Generator and we purchased another one of the same make and model. Operation of these engines is costly and does not give sufficient power for our consumption. A permanent steam engine-generator system of 250 KW capacity is high in our priority list of rehabilitation. Rewiring of the electric power lines and a new telephone system are other highly desirable items.

Books have been coming in very slowly. Most of them are teachers' references. Textbooks are particularly short. Replacement of back numbers of journals is badly needed, especially those between 1938 and 1946.

Very few of the expensive laboratory equipment lost during the War have been replaced. So far efforts of equipment rehabilitation were emphasized on those needed for fundamental courses. For instance, during 1945-46, in the general chemistry class 5-6 students worked with one set of apparatus, but now two students use a set. On the other hand, only 3/5 of experiments in physiology could be performed by students last year and the improvement we can hope to have this year is 2/3. It is still worse with more advanced subjects.

The propagation house of the College of Agriculture was entirely stripped off its glassed sashes and heating pipes and equipment during the Japanese occupation. The

0 12 1

creamery and cold storage compartment, including the cork linings, were removed by the Japanese for the use of their military hospital. Some of the original equipment was retrieved but so fragmentary and misused that they were almost unusable. Pipes and pumps for experimental farms were entirely lost. Through the help of UNRRA, a pump is made available but there are no pipes. The granary was also torn down and is waiting for reconstruction. However, since Victory, 150 acres of experimental orchards and field of the College have been reclaimed. Restoration of the cow barns, pig sties and poultry houses are completed. So are greenhouses for Plant Pathology, Field Crop and Vegetable. UNRRA donated 50 heads of pure-bred dairy stock and 10 heads of swine. Recently, friends in Pennsylvania sent us as gifts a pure Hampshire bear and some Rhode Island Red chicken.

TEACHING STAFF: There are still too few teachers for certain important courses. For instance, the Department of Economics has the largest enrollment in the whole University (216), yet on account of difficulty in getting qualified persons to teach, only 15 courses are being offered, which are far too few to meet the needs of the students.

Four members of the Arts College went abroad this summer, and so were two from the College of Science and Engineering, two from the Agriculture College, and three from the Medical College.

NEW COURSES: For the first time after Victory we are offering three courses in Music, one credit each, as electives for Arts students, all taught by wives of our American faculty members voluntarily.

TUITION: Although we have raised our tuition (including room and medical fee) from NC\$150,000 last Fall to \$1,760,000 this Fall, there is actually a decrease in term of American dollars.

17 tuition scholarships, with 3 more promised, are available to needy students, through endowments and annual gifts. The total amount is about 27,600,000 NC\$. We have also set aside a considerable portion of our tuition income to give 50 or more needy students who are willing to work in different parts of the University. If they work 48 hours a week, they are paid enough to cover board in the University Dining Hall, which varies from month to month. Last year, 20 of them get parts of their pay from the local committee of the National Students Relief Fund.

THE UNIVERSITY AND THE COMMUNITY: The Child Welfare Committee of South China sponsored a study conference for child welfare workers in and around Canton during the months of July and August. Lectures were given by Lingnan faculty members of the departments of education and sociology and of the Medical College on Child Health, Nutrition, Institutional Sanitation, Child Education and Individualizing the Child. A group of students of Sociology majors are sponsors of 10 clubs for orphan boys and girls between the age of 10 and 17. Students from a number of departments voluntarily offered their services to the Students' Christian Association to teach from 3 to 8 hours a week workers' children in a day school and illiterate adults in night classes.

Sincerely yours,

s/s Y. L. Lee  
President

## Canton Christian College, Girl Students

1. Lam Sui Yi - Senior  
Daughter of Lam Woo, a wealthy contractor in Hongkong. A graduating senior but doing her last semester's work "in absentia". The family are all Christians and are very nice.
  2. Lei Wai Hing - Senior  
She is the most musical of any of the girls and would like to teach music and collect little Chinese songs.
  3. Liu Fung Ling - Senior  
One of the finest and brainiest girls one could find anywhere. She is quite literary, speaks very good English and is a very good student. Last year she taught school to help her sister stay in school. This year both are here. She has greater breadth of view and understanding and sympathy and good sense than most girls or rather most people.
  4. Tong Yat Hing - Senior  
Lives in Hongkong. Has a sister at University of Michigan and would like to go there herself next year, to study history and education. She has done some rather interesting work with the women in her village. It is not a poor village but the life of the girls and young unmarried women is pretty dull. There are few Christians in the village and Yat Hing may go back and work there.
  5. Wong Tsui Fung - Senior  
President of the Y.W.C.A. and quite a hard worker. She is energetic and ambitious. Has applied for the Barbour Scholarship fund at Michigan.
- 
6. Chan Hang Yung - 1925  
Quiet - not particularly active.
  7. Cheuk Siu Yuen - 1925  
A lovely character - gentle and thoughtful. She appears quite happy but at heart is quite sad as are many Chinese girls. She is supposed to be engaged to Mr. Ma but it has never been announced and it would take a good man to deserve her.
  8. Cheung Ming Chiu - 1925.  
Has a sister at Michigan. She comes from Java and speaks very good English. Her father is very anxious for her to become a doctor and though she really does not want to be one, she has been planning and thinking it for so long, that she is going ahead with medical training. She says her father would be too disappointed if she gave up the idea and so she may go to Peking next year. She ought to be working along other than scientific lines for her chief interests are really not in science. She is one of the prettiest girls in the house and is of a lovely disposition and is healthy and energetic.
  9. Fung Leung Yuk - 1925  
Very lively - Has done quite a bit of acting in plays given on the campus. The girls never act with the boys in any plays anywhere except here at school. Her father was in the parlia-

ment in Peking but left when the present president came in.

10. Hoh Yuk Ying - 1925

Very capable. On the camping trip she was the one who really took charge of the food - was chief cook, chief buyer, manager and always Johnny on the Spot. Her mother is a widow - a Bible woman and "Amy" has been teaching and doing for herself and helping her mother and assuming responsibility generally for a good many years.

11. Ip Chi Wing - 1925

quite executive - a great worker in the "White Cross" - Summer daily vacation Bible schools.

12. Lam Sui Yan - 1925

Daughter of Lam Woo.

13. Lei Shuet Hung - 1925

A girl who has suffered because she adopted Christianity in spite of her family's opposition. They refused to keep her in school and so she has worked and had scholarships. She is quite scientifically inclined and does very good work along that line. Her health is not so good as it ought to be, though she is better this year than last.

14. Sin Yuk Tsing - 1925

Of an wealthy old time scholarly family. She has taught last year and this in the Middle School. She is tiny and frail and does not have very good health - partly I think because she has never had any exercise in her life. She loves to study and spends most of her time that way. She is also a very fine artist, (painter) Chinese style.

15. Wong Maan Shing - 1925

A very likable cheerful girl who has underneath the very common pessimism of the Chinese girl. Her mother was the second wife of a man once very wealthy. When the father died the mother became a teacher in the home village where she was the only Christian. Nancy is concerned over making her mother happy and doing something for her people, but she apparently cares little for her own happiness. Marriage as she sees it doesn't offer much of an attraction. She is devoted to her mother and will so arrange her life as to best make her mother happy. She is here on a scholarship.

16. Yue Kwai Mei - 1925

---

17. Chan Kaan Hing - 1926 -) New girls this year

18. Kwok Pui Shing - 1926 -) from Truelight.

19. Lau Tsing Ming - 1926.

A sophomore but belonged originally to the present Senior class. She is the daughter of a "first" wife but not a favorite wife and her life has not been too happy in many

respects. Things are going very well for her now however though her health is not too good.

20. Sit Chik Pai - 1926  
Also a new Truelight girl - very lively and healthy.
21. Wong Sau Ping - 1926  
A scholarship girl.

---

22. Chan Mo Kit - 1927
23. Chue King Ho - 1927  
From Hainan. She is here on a scholarship and taught some time before being able to come here even with a scholarship. She seems a little older and is a wonderfully fine and very likable girl.
24. Mui Suet Ying - 1927  
Her father is in Chicago and she expects to go there next year.
25. Ng Suk Haan 1927  
She is teaching part time in the Primary School and is a good student and awfully hard worker.
26. Wong Chan To - 1927  
A very quiet and shy girl but one embarked on a medical career.
27. Yeung Yuk Lim - 1927  
Daughter of the matron (a minister's widow) of the Girls' Dormitory. A rather quiet girl and a little difficult to get acquainted with but the biggest tease in the house. She had a wonderful time and a very successful one on April 1st.
28. Chan Pui Yue -  
From Swatow. Has had to learn to speak Cantonese, as have two of the other girls.
- Liu Mang Sing - (ill on day pictures were taken)  
Daughter of Ex-Governor of Kwangtung. Little, quite lively and quite sought after. Non-Christian.

SENIORS

1. ✓ Lam Sui Yi, She and #12 daughters of Lam Woo, Hongkong
2. ✓ Lei Wai Hing 1924
3. Liu Fung Ling "
4. ✓ Tong Yat Hing "
5. ✓ Wong Tsui Fung, President of Y.W.S.C.A.

Oct. 1923
