INFORMATION BLANK

FOR

CHINA CHRISTIAN COLLEGES' FACULTY MEMBERS

Among the main contributions the Christian Colleges are making to China is their faculty members. For it is you teachers who are training China's future leaders.

One of the most effective and graphic stories we in America, who are trying to get financial support for your college, have to tell is the story of our teachers, and the contribution they are making in their chosen field of endeavor. You, as one of these faculty members, are part of that story.

Publicity about the Christian Colleges' teaching and administrative staffs can do much to inspire confidence in these institutions by making it known that trusted and competent persons are responsible for their policies. But to tell this story we need much detailed information about you and our other teachers. We should like to know in some detail about the books you have written, the research projects you have undertaken, your experiences during the war, etc.

This kind of information we do not have in our files. So we are asking you to fill out this information blank and return it to us as promptly as possible.

Sigma Xi Society upon receiving Ph.D.
34. EXTRA-CURRICULAR ACTIVITIES PARTICIPATED IN Cosmopolitan Club

0825

35. WHAT ARE YOUR HOBBIES? Photography

36. WHERE WERE YOU AND WHAT DID YOU DO DURING THE WAR? Since the war with Japan broke, I remained in U.S. one year to finish my research work. Then I went to Germany, helping the government to buy an Iron and Steel Works. In 1940, I returned to China, joined the National Resource Commission, designed and operated the Yunnan Iron and Steel Works, ^{in Kunming} which supplied iron and steel to government arsenals, and taught part of the time in Yunnan University.
37. PLEASE TELL BRIEFLY ABOUT ANY UNUSUAL EXPERIENCES YOU HAVE HAD. FOR EXAMPLE, WERE YOU INTERNED, CAPTURED, BOMBED, ETC?

During the October Bombing of Kunming in 1940, we were bombed almost everyday. There were no bomb shelters in Kunming as they had in Chungking. When the air-raid siren sounded we just took to the field around the city. Once we were caught not far from the East gate. The missiles came screeching down. They seemed so close as to be right over our heads. We dived into the ditch and waited for the inevitable. It was a relief to hear the explosion although we felt the earth trembled under us. For a few minutes, we did not dare to look up, for the Japanese raiders were machine gunning the panic-stricken crowd. When the raid was over we found our faces and clothes covered with dirt. Fifty ^{yards} ~~feet~~ away there were several bomb craters, thirty ~~feet~~ ^{yards} wide and half as deep. Maimed bodies lay right and left by the hundred. You felt no pity, no misery but a keen desire for revenge!

INFORMATION BLANK

FOR

CHINA CHRISTIAN COLLEGES' FACULTY MEMBERS

Among the main contributions the Christian Colleges are making to China is their faculty members. For it is you teachers who are training China's future leaders.

One of the most effective and graphic stories we in America, who are trying to get financial support for your college, have to tell is the story of our teachers, and the contribution they are making in their chosen field of endeavor. You, as one of these faculty members, are part of that story.

Publicity about the Christian Colleges' teaching and administrative staffs can do much to inspire confidence in these institutions by making it known that trusted and competent persons are responsible for their policies. But to tell this story we need much detailed information about you and our other teachers. We should like to know in some detail about the books you have written, the research projects you have undertaken, your experiences during the war, etc.

This kind of information we do not have in our files. So we are asking you to fill out this information blank and return it to us as promptly as possible.

35. WHAT ARE YOUR HOBBIES? *In 1906 I discovered site of Stone Age Implements in the Whien Shan Lake, 1/2 mile from my own village. Have been collecting & writing articles since then.*
36. WHERE WERE YOU AND WHAT DID YOU DO DURING THE WAR? *At Huchow & Shanghai 1937-1940. Studying in America 1940-1945. Besides preaching & speaking, I have been Sr. counselor, camp Sinking Creek of Chester "Y", Pa.; Supervisor, Camp Spruce of Scranton "Y", Pa.; & Director of Religious Activities & Inspector of camp, Camp Carson of Germantown "Y", Pa. Generally residing at Grezer Seminary, Chester, Pa. I went to school at the University of Pennsylvania. Have visited Yale, Martha Vineyard, D.C., Hampton, Va., ^{Atlanta City, N. Y., Chicago, Chicago, Kansas City, Cleveland, & other large cities.}*
37. PLEASE TELL BRIEFLY ABOUT ANY UNUSUAL EXPERIENCES YOU HAVE HAD. FOR EXAMPLE, WERE YOU INTERNED, CAPTURED, BOMBED, ETC?

(1) On November 8, 1937, I hid myself in a dryout at Kashing, Chekiang, for nearly two hours when a number of Japanese bombers were bombing the station only an arrow distance away. With a large parcel of silkworm cocoons as protection for my head, I prayed most of all the time awaiting the last fatal moment. (2) On December 19, 1937, I went to take my family back to Shanghai from Huchow via Hangchow and Ningpo which were then in Free China. I could not enter my own village as the Jap soldiers were "hunting for something". I halted myself in a hamlet about a mile away. Unexpectedly a group of Japs were "smelling" around another hamlet only about two hundred yards away. I stayed inside my relative's hut trembling. Fortunately they did not come far enough. (3) Interesting experience of "Initiation", ceremonial admission to "Tatanka", Indian Order of Fraternity of Camp Carson of Germantown "Y". (4) At Grezer Theological Seminary, I was appointed Fireman, watching for one floor during blackout. A Polish pastor was in charge of another floor. He was nicknamed "Bishop." We two ^{be} right two of the most dutiful "wardens." (5) Finally I sailed from Erisce October 4, 1945 on Navy "S.S. War Hawk" thru the arrangements made by The Department of State and Chinese Embassy. The boat stopped at Pearl Harbor for thirteen days. I enjoyed visiting around. With life-belt on day and night, I had all sorts of drills and thrills and sometimes heard actual "puppups!" A Jap suicide bomber once killed 67 servicemen. She was repaired with special signs for her merits. I watched the Harberr of Okinawa with very keen interest. Everywhere on my way back, I could not but marvel at the greatness of Uncle Sam. I realized then the role of U.S.A. in time to come. In a word I got a valuable and interesting experience of chop-suey type.

35. WHAT ARE YOUR HOBBIES? stamp collecting

36. WHERE WERE YOU AND WHAT DID YOU DO DURING THE WAR? In China with the U.S. Army
as liaison officer with the AGAS unit in the areas of Chekiang,
Anhwei, Kiangse, and Fukien.

37. PLEASE TELL BRIEFLY ABOUT ANY UNUSUAL EXPERIENCES YOU HAVE HAD. FOR EXAMPLE, WERE YOU
INTERNED, CAPTURED, BOMBED, ETC? In line with the operations of the AGAS unit in the forward station
at Tunki, Anhwei province, participated in the rescue of flyers coming
down in the Nanking-Shanghai area. It was necessary to set up a net
work of alerted native civilians to pick up these men as soon as they
fell, as the territory was in the hands of the enemy and the aviators
had no knowledge of the lay of the land. This work became even more
important after VJ day as many of the planes going into Nanking from
Chungking flew over this area and scores of planes came down. The
personnel were all fortunately taken care of. Another important operation
was keeping up the morale of the Chinese in occupied territory by
furnishing them with supplies and news.

INFORMATION BLANK

FOR

CHINA CHRISTIAN COLLEGES' FACULTY MEMBERS

Among the main contributions the Christian Colleges are making to China is their faculty members. For it is you teachers who are training China's future leaders.

One of the most effective and graphic stories we in America, who are trying to get financial support for your college, have to tell is the story of our teachers, and the contribution they are making in their chosen field of endeavor. You, as one of these faculty members, are part of that story.

Publicity about the Christian Colleges' teaching and administrative staffs can do much to inspire confidence in these institutions by making it known that trusted and competent persons are responsible for their policies. But to tell this story we need much detailed information about you and our other teachers. We should like to know in some detail about the books you have written, the research projects you have undertaken, your experiences during the war, etc.

This kind of information we do not have in our files. So we are asking you to fill out this information blank and return it to us as promptly as possible.

Please mail to: PUBLICITY DEPARTMENT
ASSOCIATED BOARDS FOR CHRISTIAN COLLEGES IN CHINA
150 FIFTH AVENUE
NEW YORK 11, N. Y.
U. S. A.

(禪杖浜 黎里 吳江 江蘇)

4. NAME AND ADDRESS OF NEAREST RELATIVE IN U.S. _____

5. NAME OF UNIVERSITY Hangchow Christian College

COLLEGE Engineering DEPARTMENT Civil Engineering

6. PRESENT RANK Lecturer in civil engineering DATE JOINED FACULTY Fall Semester, 1943
(Title, i.e. Prof., Ass't Prof., etc.)

7. AT WHAT OTHER UNIVERSITY HAVE YOU TAUGHT? _____

_____ DATES _____

8. LIST GOVERNMENT OR BUSINESS POSITIONS HELD (WITH DATES) Assistant engineer in the
Chekiang-Kiangsi Railway Bureau (1942 in Kiangsi). Assistant engineer in the
Northern China River Regulation Committee (1943 in Fukien). City engineer in

9. ~~ANY OTHER SPECIAL ASSIGNMENTS~~ the Poochen city Government (1943 in Fukien).

10. LIST BOOKS YOU HAVE WRITTEN _____

11. DESCRIBE ANY SPECIAL RESEARCH YOU HAVE DONE In 1941, after graduation from college,
invented a special kind of "range-finder" for determining inaccessible dis-
tances.

12. DESCRIBE THE WORK YOU ARE NOW DOING. LIST THE COURSES YOU TEACH AND ANY SPECIAL PROJECTS
YOU ARE ENGAGED IN In this semester, I teach two classes of strength of mate-
rials (one for mechanical engineering students and one for civil engineer-
ing and architectural engineering students, totally 61 students) and one
class of dynamics (mixed big class of 54 students). Beside giving lectures,
I have to correct papers. For the last semester, I taught applied mechanics
and calculus.

35. WHAT ARE YOUR HOBBIES? Write and translate science and engineering articles
appeared in the newspaper and in some magazines.

36. WHERE WERE YOU AND WHAT DID YOU DO DURING THE WAR? 1941: Did research work in
Shanghai. 1942 : As assistant railway engineer in free China Kiangsi.
1943: As assistant hydraulic engineer in Fukien; as city engineer in
Fukien; as lecturer of engineering in H.C.C. in Fukien.

37. PLEASE TELL BRIEFLY ABOUT ANY UNUSUAL EXPERIENCES YOU HAVE HAD. FOR EXAMPLE, WERE YOU
INTERNED, CAPTURED, BOMBED, ETC?

After the incident of Pearl Harbor, I left Shanghai and entered the free
China then. On the way, I passed the Japanese defense line, but was
attacked by bandits. In may, 1942, when I was working in the railway
bureau, I was attacked by Japanese bombers in an early morning. Two
bombs exploded simutaneously side by side only about 100 feet apart.
I laid flat on an open ground which was right between the two explosions,
but was luckily unhurt. In the same month, I was almost killed by the
machine guns of the Japanese planes. One of the bullet missed me by
not more than one inch. During the war, I evacuated three times. The
worst evacuation was when Japanese soldiers were only about two miles
from me.

Faculty and Staff:

Hangchow 3/20/50

There have been few changes in the administrative staff, with the exception of Mr. Wang Chia-wu, who resigned the post of Chief Secretary and was engaged as full time professor and Head of the Chinese Department. To succeed Mr. Wang, Professor Ho Chao-sen has been appointed. He will carry on his concurrent duties in teaching, administration and religious activities.

Mr. A. Spurr who taught Biblical Literature last term as half time teacher, resigned at his own request. We regret to lose his valuable services.

In the College of Arts, we have secured the services of the following teachers:
1) to meet actual needs, Mr. Hsieh Kwang-ping has been engaged for teaching new politics, as required by the Government; 2) Mr. Wu Hsiang has been engaged as a part-time Associate Professor for the Educational Department.

The College of Commerce has been greatly strengthened by the engagement of the following professors:

Mr. Tsai Chin-ping	B. A., M. A. of Columbia University
Mr. Ni Hui-yuen	M. A. of University of Pennsylvania, M. B. A of University of Illinois (an alumnus and also a Christian)
Mr. Lai Loh-ming	M. A. of University of Illinois

They have, besides their splendid academic attainments, wide and rich experiences both in educational and business circles.

Dr. Li En-liang and Mr. Lu Chin-hsiang have been newly added to the faculty of the College of Engineering. Dr. Li, an alumnus, had accepted our invitation last year, but owing to the interruption of communication, he was not able to come until this term when the communication line between Hongkong and Hangchow had been restored. Mr. Lu is a Christian and a French returned student. He has considerable experience in practical architectural engineering.

Hangchow University, Fall Term 1950

(Statistical Information, based on data as of October 20)

I. Student Enrollment, Distribution and Classification

1. Total number enrolled is 909. Present number in residence is 897, as 12 persons withdrew during the first month. Male 749, female 148. Residing on campus 858, Shanghai Branch 39.
NOTE: After one month's residence, 25 Engineering Seniors were withdrawn from their studies by the Government and placed into emergency service. It is presumed this will delay them one year for graduation.
2. Distribution of students by College: (Below are new students)
Total, College of Arts and Science -- 85 (44)
,, of Finance & Economics --248 (106)
,, of Engineering --564 (192)
NOTE: Department of Business Administration is drawing the predominant numbers (118) in the College of Finance and Economics. Mechanical Engineering stands at the top (265) in the College of Engineering. In the College of Arts and Science, Foreign Languages has 32, while Education has 29.
3. Distribution according to class (campus only) shows:
Freshmen 407 Junior 105 Unclassified 5
Sophomore 210 Senior 120 Guest 10
4. Admission of new students: Two entrance examinations were held.
(1) In July entrance examinations were held in Hangchow, Shanghai, Nanking and Canton, with 865 applicants.
(2) In August examinations were held in Hangchow and Shanghai only, with 607 applicants. From this total of 1462 the number accepted was 774. Finally, 342 of these are actually enrolled.
5. Number of Christians (professing): In total student body 135; (approximately 15%). Among First Year students 40.

II. Faculty and Staff, Numbers and Classification

1. Total Teaching Faculty numbers 102 (including three missionaries).
Classification and division by college shows:

	<u>ARTS</u>	<u>FIN. & COM.</u>	<u>ENGIN'G</u>	<u>TOTAL</u>
Full Professors ---	18	10	20	48
Assist. ,, ---	4	3	3	10
Lect. & Instructors	6	---	10	16
Assistants ---	5	5	13	23
	<u>33</u>	<u>18</u>	<u>46</u>	<u>97</u>

To this should be added, for general instruction; ----- 5
(Political Training 2, Physical Education 3) 102

NOTE: It is to be remembered that the College of Arts does foundation work for the whole university in terms of languages and general science. The number of professed Christians on the faculty and staff is 45.

III. Administrative staff has a total of 26, of which 4 do part-time teaching.

IV. Campus workmen - janitors, tradesmen, outside workmen, etc. number 65.

March 3, 1949--

Opening of Second Semester--

Opened a week late on account of political situation, inflationary drop in gold yuan values, with consequent soaring of costs for tuition, railroad travel, and food, as well as because of heavy movement of military personnel out of Nanking and Shanghai involving commandeering of nearly all rolling stock.

Enrollment unexpectedly good, however, with *about* 750 on this campus and 120 in the Shanghai unit.

Senior Middle School moves into its new dormitory in the ravine below and east of the Alumni Library, with enrolment of 70.

NEW STAFF-MEMBERS:--

temporarily
Dr. C.Y. Wu (Wu Chi-yü) in Pol. Sci. Dep't (~~part-time~~):* Will shuttle between Nanking, where he is associated with the Ministry of Foreign Affairs, and Hangchow, where he is conducting courses in Introduction to Pol. Sci.; International Law; and The Chinese Constitution; will also supervise senior theses written in Chinese.

His training and service record is outstanding:-- Grad. Yenching, '27. Taught there '33-45. Earned Ph.D. at Princeton, '30-'33. Headed Pol. Sci. Dep't Yenching '35-'45 and was Dean of College of Public Affairs, '42-'45.

Trekking to Chungking via Chekiang, Fukien, Kiangsi, and Hunan, almost shot in passing Jap lines in Chekiang. Was posing as tea-merchant and with three friends was caught in shooting affair between Japs and Chinese guerrillas. Taught in Yenching-in-Chengt'u, '42-'45 and when Yenching returned to Peiping, Dr. Wu was called to join gov't service in Nanking. Hopes to be released for ~~full-time teaching~~ *campus residence* soon.

Prof. Shin Kah (Kah Shin) in Mech. Eng'g Dep't (part-time): Will give a course in electrical engineering for M.E. students while continuing government service in charge of the Hangchow laboratory of the Radar Research Establishment.

After graduation from our physics department, *Mr. Kah gave* four years to teaching here, another four years to Soochow University, as well as teaching in Great China University and other institutions. During the war ^{he} had charge of seven radio stations of the Chinese Air-Force at Din Jan in Assam and at Calcutta, Allahabad, New Delhi, Jodhpur in India and Lahore and Karachi in Pakistan, necessitating his making 17 plane trips "over the Hump" in the course of his duties, as Lt.-Col. with commission in the Air-Force.

The years 1945 to 1947 he spent in England in charge of a group of Chinese students following the latest developments in radar research. Since then much of his time has been spent in connection with the Government Radar Research Establishment in Nanking. We ~~expect~~ ^{all} he will help us get the proposed ^{all} campus telephone system installed.

March 30, 1950

Two of our Graduate Engineers Weather War-time Experiences To Return To Our Engineering Teaching Staff. T.D.Hsu, lecturer in "Materials Testing", and Wang Wei-yeu, assistant to Dean Liao, tell their own stories.

Wang Wei-yeu's Tale

Back in 1942, three of us young engineers, including Hsu Ts-deh and a friend named Chu, and myself, slipped out of Shanghai by steamer to Ningpo. From there we hired a small boat to take us up the Yung River to Yuyao, where we had to get through the Japanese lines. Disguised as merchants and with the help of Chinese police, we succeeded in passing Japanese inspection of our little boat and pushed on to Shaohing, walking much of the way. On the way to Tung-Yang, our chief fear was of bandits infesting the countryside, making travel exceedingly dangerous.

Fortunately, we had had the foresight to mail photo-static copies of our diplomas from Shanghai to Kihwa, and to arrange through shops to have money transferred. We found the photos all right, but for some reason there was no money awaiting us. We therefore had to ask the railway officials for jobs to earn money for our travel and food.

After working a few months, we were dismissed because of the Japanese drive up through Chekiang, compelling the railway men to move their office to Kweilin (in Kwangsi). We tried to persuade them to take us with them, but they refused and we found ourselves stranded with very little money at a place called Zang-Yu in Kiangsi Province.

From Zang-Yu we decided our best move was to strike south, trekking to the mountains of Fukien, which seemed to be the safest place to go. On the way, however, we lost all our baggage and arrived finally at Yung-An in Fukien with nothing but the clothes we stood up in, famished and destitute of cash.

At Yung-An we got a little help and information and pushed on to Nan-Ping, where we fortunately met President Lee Ba-en, Treasurer N.P. Chang, and others of the University staff, who had been busy setting up a branch of Hangchow University at Shaowu, Fukien. Here we said goodbye to Hsu, who went to teach at Shaowu while Chu and I went back to Yung-An to look for jobs. I found a place in the Provincial Rice Bureau, building granaries for storing the rice, while Chu made his way overland to Chungking. After V-J Day, I made a quick trip up to Shanghai for a rest, then returned to Yung-An for a further period of service. In 1946 I came up to Shanghai, as I didn't see much future in the rice bureau job. After making a trip to Taiwan to look around, I received an invitation from Dean Liao to join the staff here at my Alma Mater and came in 1948 for the opening of the fall term. I hope some day to get more training in structural engineering and get practical experience building bridges or apartment houses and office-buildings, which will be so much needed in the years to come.

WANG WEI-YEU

C. B. Day

0870

from

HANGCHOW UNIVERSITY**Hangchow, Chekiang****China****Telephone 1438**T.D.Hsu's Tale

T. D. Hsu

On the first day when I came to Shaowu, in the mountains of Fukien, I was struck by the sight of civilians wearing bootlike, thick, white stockings almost up to their knees. While eating in a restaurant in the town I asked the restaurant keeper about those queer-looking stockings. In an unmistakable manner he whispered to me, "The plague! It's the plague in the city!" So, this was my welcome to the city of Shaowu.

Fortunately the bubonic plague didn't spread very fast through the city, yet it took a toll of lives at a steady rate of two or three a day. At one time, when the plague was very serious, most of the people abandoned the city, leaving nearly every shop closed as at night.

Fortunately our college was situated on the outskirts of the city across a river which we thought inconvenient, but which was also inconvenient for the dreadful disease to cross. If we wanted to go into the city, we had to wear the same kind of white stockings, to prevent the plague-spreading lice from getting on us. We were always worrying whether we had been infected or not, and the slightest abnormality in our physical condition would cause a week's anxiety until we had become convinced that there was no danger of being caught by the black death. It was no fun to see a dead rat in the vicinity of our living quarters. Dead rats meant the prelude of the approaching plague and so they were in a sense no less to be dreaded than a living tiger.

In the college, there was neither library nor laboratory. Each time we needed reference books, we had to cross the river and borrow them from the Fukien Christian University refugeeing in the city. But it was a fearsome thing to do, with the plague all around it, and at one time even penetrating within the university. After that, for awhile, we had to give up the idea of going there. Because of this lack of books and experimental apparatus, I sometimes said to the students, "I am teaching philosophical engineering courses."

One day when I was reading in my room, I caught sight of smoke rising from the hill behind our buildings. It proved to be a grass-fire and was spreading very fast. We all rushed out to fight it, for it had already caught several pine trees only a hundred yards from our buildings, behind which we had heaped a great pile of firewood. If the wild fire should get into our stack of fuel, our houses would surely burn to ashes. Therefore, we worked desperately until, some three hours later the fire was brought under control. After it was all over, I told my students that was the most strenuous exercise of my whole life and I hoped I would never have to be a fire-fighter again.

Mr. Hsu Ts-deh graduated from our engineering school in 1941. After serving as assistant engineer for the Chekiang-Kiangsi Railway, he returned in 1943 to become lecturer in the Civil Engineering Department of our College of Engineering, at the invitation of Dean W.T.Liao. He has taught physics, calculus, applied mechanics, and dynamics, but is now giving most of his time to teaching materials-testing, for which he is preparing a textbook in Chinese: "A Guide to Materials-Testing", to be completed this term.

HANGCHOW UNIVERSITY

Hangchow, Chekiang

China

Telephone 1438

Dr. Y. L. Lee joins Engineering Staff

DR. Y. L. LEE

Yen-liang Lee was born in Taishun, Kwangtung, in South China. He was graduated from Hangchow University in June, 1937, with the degree of B.C.E. In the fall of 1938 he went to the United States and entered the University of Michigan where, in the following year, he received the M.S. degree.

Then he transferred to Cornell University, where he obtained his Ph.D. degree in the year 1941.

Returning to China in that same year, Dr. Lee was engaged as a structural engineer by an architectural firm in Shanghai. In 1942 he made his way to Free China and became a professor in the National Chekiang and National Fu Tan Universities, respectively. For a time he was also dean of the Hangchow University School of Engineering when it

was refugeeing in Kwiyang, Kweichow. Since 1946, Dr. Lee has been a registered professional engineer, establishing his own office in Hankow, but, at the urgent invitation of Dean Liao he consented to join our engineering staff as professor of Structural Engineering, and brought his wife and three children here at the beginning of this term.

Prof. Ho Chao-sen becomes Chief Secretary
in the University Office

HO CHAO-SEN

Recently Professor Ho Chao-sen was invited by the Administrative Council to take the position of Chief Secretary to the University, in addition to his other duties as professor of English.

Mr. Ho was born at Iwu in Chekiang in 1906 and received his early training from his father who was a Buddhist. During his college course, however, he became a Christian, being baptized by Dr. C. B. Day, who was acting as college pastor at that time.

After graduation, Mr. Ho became a teacher of English Language and Literature, a subject of which he has been passionately fond and for which he has shown increasing capacity through the years. He says that there were times when, after beginning the reading of a good book, he would go without food or sleep until he could finish it.

His zeal for teaching expressed itself in 1935 in the compiling of a textbook, College English Readings, and again in 1937 in the publication of his anthology of Modern Short Stories. He has also contributed numerous articles to various periodicals.

Mr. Ho's teaching experience has been long and varied. For many years he was teaching in National Honan University, and during the war he was in Free China, associated with National Central College of Technology and Kwang Hua and National Szechuan Universities. In 1948 he returned to his Alma Mater to help in the English Department. He has also been very active as Chairman of Religious Activities and Secretary of the College Church of which he is an elder. He is in great demand as a public speaker, as counsellor to students and as "contact" man in our relations with the local government.

C. B. Day

HANGCHOW UNIVERSITY

Determining the mechanical equivalent of heat.

Determining the coefficient of linear expansion.

George Chiang

George Chiang

George Chiang (Chiang Ch'ao)-- was born June 1, 1914, at Lanchi, Chekiang, where he began his schooling. Later he enrolled in the National Tung-Chu University Mechanics Department at Woosung, near Shanghai. At the outset of the Sino-Japanese hostilities, the institution's buildings were entirely destroyed and the university was moved inland. As a result, Mr. Chiang went abroad to Germany in 1938 and entered the Technische Hochschule, Berlin, majoring in general mechanics. While a student there, he was awarded the Humbolt Scholarship for two years. After graduating in 1942, with the degree Dipl.-Ing., he accepted employment by the German Mechanical Engineering Firm, "DEMAG", in Berlin.

He spent some time in research at the Technische Hochschule in Dresden and later went to Geneva, Switzerland, where he worked as engineer for the firm of Hispano Suiza, S.A. During this time (approximately four years), he specialized in Internal Combustion Engines and their development, writing many technical articles among which was one entitled "A Study of How to Improve the Efficiency of the Diesel Engine."

Returning to China at the request of the National Government, in 1947, he was appointed as professor of mechanics at National Yin-Tze University in Kihwa, Chekiang. From there he was called to the department of mechanical engineering at Hangchow University, as professor of heat-power engineering and internal combustion engines.

During the past year, Mr. Chiang has been in charge also of the experimental workshop, which includes the welding shop, machine shop, woodworking shop, bench room, forge room, and foundry, with an equipment of nearly fifty machine tools operating on a current of 76 h.p. Because of lack of other equipment and personnel, the work is developing but slowly. Recently an order was executed for the East China Bureau of Industry in the nature of a pile-driver to be used in the construction of cofferdams.

H. H. Huang

H. H. Huang was born in Soochow, Kiangsu, 1913, and educated in Chiao-tung University, Shanghai, where he graduated with the degree B.S.C.E. in 1933.

Some years were spent as Lecturer in Civil Engineering in the Kiangse Provincial Technical College, Nanchang and also at Great China University, Shanghai, until he was called to be Associate Professor in C.E. at Chiao-tung University, his Alma Mater.

More recently, Mr. Huang has become Head of the Engineering Department and Superintendent of the Hangchow Waterworks. He is concurrently teaching ~~two~~ three courses in our University, one in Water Supply Engineering and the other in Water-Supply Engineering Design, and one in Masonry Construction.

EUGENE Y.D. BAO

Bao Yoh-dzang (Eugene Y.D. Bao) graduated from the University of Shanghai in 1927 and immediately went to teaching English in various middle schools: the Union Girls' School, Hangchow; Wayland Academy (Baptist), Hangchow; Y.M.C.A. Evening School, Hangchow; and Vincent Miller Academy, Soochow (Presbyterian).

During the war against Japan, he was employed by the Chinese Air Force as a civilian interpreter and was sent to the States in December, 1942 with the Air-Training Detachment. There he stayed more than four years and returned to China in April, 1946.

While in Washington, D.C., Captain Bao enrolled in the Capital Radio-Engineering Institute's radio training course, but had to drop it on account of his transfer to service in another state by order of the KMT Government. Later in New Haven, Connecticut, he made plans to enter the post-graduate course in political science, but again was prevented by a transfer elsewhere. Taking advantage of another transfer in December, 1943, he took the trip from Phoenix, Arizona, to Washington, D.C. by Greyhound bus instead of train or airplane, either of which he was authorized to take, in order the better to see the country. He says it was one of the most interesting trips he ever made and satisfied his curiosity.

Being interested in journalistic enterprises, he took every possible opportunity to visit the leading newspapers in Los Angeles, Chicago, and New York, and was much impressed by their complicated management and the speedy printing presses of the New York Times especially. Disapproving the civil war advocated by the KMT after the long weary eight-year struggle with Japan, he quitted the service in December, 1948, and accepted a teaching position in Yuen Kwang Academy, a Baptist missionary school in Shaohing, Chekiang. In the fall of 1949, Mr. Bao accepted the offer of Hangchow University to join its English-teaching staff as lecturer in the Department of Foreign Languages.

CHU FU-HSING

Mr. Chu Fu-hsing (F.H. Chu) joined our staff as ~~lecty~~ assistant-professor last fall term. Born in 1903, he was graduated from the Physics Department of National Southeastern University, Nanking, in 1925, with the B.S. degree. Since then he has taught General and Advanced Physics, Electricity and Magnetism, Atomic Physics and Nuclear Physics in the University of Amoy, Nankai University, and University of Chekiang for more than 20 years. Mr. Chu was sent by the Ministry of Education to the U.S.A for advanced study in 1946 to 1948, the first year being spent at the Graduate School of the Univ. of California at Berkeley, and the second year at the Cosmic-Ray Research Laboratory of Massachusetts Institute of Technology in Boston.

While there he worked with Dr. G.E. Valley on the son cloud-chamber for observing the tracks left by collisising the discharge of condenser through a demagnetized opening time to a few milliseconds. After his constructed with Dr. K.C. Wang of the Univ. of Chekiang a which will be used to continue their work on cosmic rays.

HANGCHOW UNIVERSITY

Hangchow, Chekiang

China

Telephone 1438

Mr. Y. S. Chang (Chang Yung-sen) has come to join our engineering staff as lecturer in Civil Engineering, giving most of his time to *Surveying and surveying field-work*.

Mr. Chang graduated in 1941 while the university was refugeeing in Shanghai. Soon after graduation, he took a steamer to Hongkong, whence he made his way by slow stages to Kweichow, traveling by train or bus to Kweiyang, thence by bus to Kunming in Yunnan. There he joined the engineering staff of the Yunnan-Burma Railway and went with others down the Burma Road under commission from the Chinese Government.

From the time he arrived in South Burma to the time he escaped Japanese encirclement, Mr. Chang's life as told yesterday to the writer (C. B. Day) was one of thrilling adventure, constantly in danger of attack from jungle beast marauding mosquitoes, or invading Japanese. In 1942 he was assigned to the First Temporary Labor Group sent to Northern Burma to build a military road for jeeps near Mt. Marta, with headquarters at Mougou. They used 2500 men: Yunnanese, Burmese, Indians, and tribesmen from the Shan States, Chang having 1500 men under him. They used 105 elephants in the construction work and for transporting rice and equipment through the jungle. Burning out the jungle by night, they hacked a road through the daylight hours, often having to run for shelter from Jap bombing planes. These night fires caused the lions to roar all around them and the monkeys to flee chattering through the dense forest. Living in camps, they usually had to make a trench around them, fill it with brush and logs, then, after 5 p.m., ~~set fire to~~ pour oil on it and set fire to it to keep off the wild animals at night. Each of the 8 men in his officer's unit had to stand sentry-duty two hours each night.

Chang found one of the big problems was to keep their 2500 coolies supplied with salt, of which northern Burma had no source of supply. One time they ran short of salt and he was sent with a detachment to Mougou to find salt inside a deadline of three days. Finding no salt available, they sat down at Mougou in hopes of a train bringing salt from South Burma. Fortunately in two days along came a trainload of salt and they were able to get a share of it for their men in time.

In the dry season they often ran short of water. Once as he was leading a ~~detachment~~ platoon of 32 men to look for water, their path lay through the jungle where they tried to watch for footprints of lions going to water. Suddenly in the path ahead they saw a huge python stretched across their path, with his head reared up to inspect them. Fearing to attack him, they waited nearly an hour until the great snake decided to move on.

One time when he was leading his men near to Ya Lung Shan, the villagers came out, 200 strong, and surrounded Chang and a few men with him, demanding that they go away and not try to build any road there, at the same time threatening to kill them if they persisted in their purpose. Chang

explained to them that he was under orders from the Chinese Government and could stop only by order of the government. But next day the headman of the village got very angry, drew a wicked-looking knife and brandished it over Chang's head as he reiterated his demand that he and his men get out. Just at that moment about 800 coolies arrived and Chang's life was saved. Moreover the village headman, seeing his gang outnumbered, pled with Chang for mercy, saying that he had really not intended to kill him. Chang let him off with a promise not to interfere with the roadbuilding work, and they went on building the road.

At last when the Japs got too close, they had to flee to the Northeast into the mountains of Yunnan, with the enemy only three hours behind. Their way led up by way of Kao Li Kung Mountain and Ta Hstieh Mountain, and there were three days when they had no food and subsisted only on berries and spring water.

Finally they got back to Kunming and were set to work building an airport for General Claire Chennault's 14th Airforce--the Flying Tigers. After that was finished they went to Kweilin in northern Kwangsi Province to build another airfield. While at Kunming, Chang said the Japs bombed them a lot, sending as many as 47 planes in one day, and killing many of their workmen and engineering personnel. The Japs would also send planes over one by one all through the night, giving them no rest for a week.

One of their last jobs was building a third airfield at Luchow in Szechuan, where 80,000 coolies were used. Chang himself directed 15,000 of them in the construction of the taxiway, a revetment and turning-circle for B-24's.

After V-J Day, Chang made his way to Chungking where he joined a party making up a truckload of men with their families and planning to drive to Hengyang in Hunan to get a train south to Canton. But they hadn't gone far before the truck ran off an embankment and rolled into a ravine, killing two and injuring all but two passengers. Chang was one of those lucky enough to escape injury. Giving up the idea of driving to Hengyang, he joined another party going later by ~~train~~ bus to Paochi in Kansu, where they could catch a train on the Lunghai Railway to Hsuehchow, after spending a month in Chang-An in Shensi, the ancient capital of China, in the spring of 1946. After getting back to Shanghai, Mr. Chang joined a business firm which sent him for three months to Taiwan. But that kind of life seemed too tame for him, so he resigned and in 1947 signed on again with a Yunnan-Burma Railway engineering outfit which was going to undertake the building of a new railroad from Kwanchouwan to Laibing in South-western Kwangsi, called the "Marshall Road", as it had been recommended by General Marshall. After two years of that practical experience, Mr. Chang accepted a call from his Alma Mater and came in the spring term of 1949 to work under Dean W.T. Liao in the College of Engineering here on the Hangchow campus.

General Consideration of the Three Colleges:

College of Arts:

During the absence of Prof. Ku Tun-jou, Dean of Arts and Head of the Department of Political Science, who is now in America for further study, the post of Dean of the College of Arts is now held by Dr. C. B. Day in an acting capacity. In view of the present circumstances, the post of Acting-Head of the Political Science Department, which had been previously held by Prof. Lautenschlager, was taken up by Dr. Wu Chi-yü, who is concurrently Dean of Studies. The vacancy of Head of the Chinese Department was filled by Mr. Wang Chia-wu. A new part-time professor, Mr. Lee Chen-chuan, was added to this Department. In English Department some changes were made. Mrs. C. B. Day left for the U.S.A. in September last. Prof. Shih K'uan-shan was engaged as full-time teacher. We also obtained the services of Miss Chang Sheng, Messrs. Pao Yu-chang, Wu Hsin-an and Yang Chien-hai, the last two teachers held concurrent posts as Associate Professor in the Political Science Department and English Secretary, respectively. A new professor, Mr. Wang Tan, joined the Educational Department.

College of Commerce:

A. Engagement of New Professors:

We regretted to lose the services of Dr. Baen E. Lee, who resigned, and Dean Chen Shih-chen who went abroad for further study. In addition to their administrative duties they taught commercial subjects in this College. For strengthening the faculty of the College, the following professors have been engaged:

Mr. Lu Huai-tao	M. A., Former Dean of the College of Commerce of Chi Nan University, as Professor of Accounting
Mr. Tsung Chih-sin	M. A., Former Professor in Nan Kai University and Customs College, as Acting Head of the Banking Department
Mr. Hu Chi-tsang	M. A., Former Professor in Chungking University, as Professor of Economics

Messrs. Shen Wen-fu, Chow Tze-ya, Chu Chen-chia and Kuo Chia-lin, for teaching the subjects of Commercial Treaties, Banking, History of Economics and Economic Geography, etc.

College of Engineering:

Faculty:

During the one year leave of absence of Mr. Wang Hua-ping, Head of our Architecture Department, Professor Chen Chih has been acting in his place. The post of Head of Civil Engineering Department was in this semester taken up by Professor Ku Shih-chi. As Professor Ying Chang-tsai had at his own request been relieved of his duties as Head of the Mechanical Engineering Department, the position thus left open was concurrently filled by Dean Liao himself. To meet the requirements of the times, at the beginning of the fall semester a Physics-mathematics Department was created, with Dr. Chow Cheng as Head. New professors engaged for the College of Engineering were Messrs. Wang Tze-hsiang, Chu Fu-hsin, Wang Ting-tsen, Chen Jen-chu, Chang Tsung-jen, Huang Hung-chu and Yang Te-yung. We feel gratified to have secured their valuable services.
