Dean of Women - reports  
1926-1939,  
1944

REPORT  
OF THE  
WOMEN'S UNIT  
FOR YEAR ENDING JUNE 1926

To the Field Board of Managers and  
The Women's Committee of the Board of Governors.

Ladies and Gentlemen,

The first report of the Women's Unit of the University to this body announced the completion of the Women's Dormitory, now called Leonard Hall, and a faculty residence, as contributions from the Women's Committee of the North American Joint Board to the University plant. This third report announces that this same Women's Committee has secured over two hundred thousand gold dollars for a new hospital. The Dean of the School of Medicine explains how war conditions have delayed the building, but we anticipate the day when crowded wards and confused clinics will be forgotten, and we would here express our joyful thanks to the women of America and to the China Medical Board who are making possible a much needed enlargement of the hospital work.

THE FIRST WOMEN GRADUATES OF CHEELOO.

Our second notable event of the year is the graduation of three women students from the School of Medicine in January, and another one in June. As far as we know, this is the first time that a degree in medicine has been conferred upon women in China. To these first women graduates of Cheeloo we extend our heartiest congratulations.

STUDENTS AND STUDENT ACTIVITIES.

The enrolment in the autumn was 53, an increase of 20 over the number enrolled a year ago, but by the graduation of three and the dropping out of six others, the number in the spring semester was reduced to 18 in the School of Medicine, one of whom has left because of a nervous breakdown, 6 in the School of Theology, 6 in the Pre-medical course, 8 in the Department of Education in the School of Arts and Science, and 6 in the Sub-freshman course. The Presbyterian Mission (North) had the largest number of students, nine, the Methodist Episcopal, American Board and Lutheran United Missions have each seven students, the United Free Church of Scotland has six, and there are smaller numbers from the Baptist, Anglican, United Church of Canada, English Presbyterian and China Inland Missions, and the Chinese Independent Church. There are now

Five students who are not church members, two of whom are not in residence. It is hoped that the number entering for the Medical and pre-medical Courses may soon increase, as there are not now enough women physicians to fill the vacancies in Mission Hospitals, such as to meet the opportunities which could easily be found for them in other hospitals, in public health work and other community service, especially in the vast rural field where medical work for women is sorely needed to relieve the sufferings and prevent the loss of eighty per cent of the women of China. Men can more easily leave their country homes to seek relief in distant hospitals.

Chechow's women students come from thirteen provinces and Korea. Two from the province of Szechuan who have not returned home since they went to the women's college in Peking seven years ago for pre-medical work, are among this year's graduates in medicine, and return with joy to the work awaiting them there.

Student activities and religious life are covered, to a large extent, in the reports of the deans of the three schools, for Mission Union co-operation in student, and only in the Y. W. C. A. and the Women Students' Self-Government Society, which includes a committee on athletics, are there separate organizations. For the second time in the three years of its existence the Students' Christian Association has elected a woman as its president. In the student demonstrations following the 30th 1925 women students took their full part, quietly but with great determination. More than half of the women students have engaged in some definite service at least once a week, over twenty in many school work for children, several in giving and talking with women on Sunday, "Women's Day" in the museum of the Extension Department, six for about three months led sections for women in the hospital. It is our strong conviction that students will not leave the University with the spirit of service unless during the years here they are giving themselves to such work, however limited their time and strength for it may be. There is now but too little to expect cooperation, and this concludes one of our plans for added staff members.

#### STAFF.

Of the eight members nominally belonging to the Women's Unit of the University, Dr. Scott and Dr. Maddell have been on furlough, and the two new members, Miss Margaret Cochran, and Miss Anna Luodern, who was appointed by the American board to Chechow last autumn, were in the language school in Peking until Miss Cochran resigned to accompany Dr. and Mrs. Cochran back to America, and Miss Luodern because of her engagement to be married in May. Dr. Heath, Dr. Corbett, Dr. Wright and Miss Singer have been the only workers on the field. An invitation has been extended to Dr. Marion King, now doing

graduate work in Johns Hopkins, to join the staff as assistant professor in the School of Medicine as soon as she has discharged her obligations to the P.U.M.C. and it is hoped that her salary will be paid by the American Board, and that from some source salaries can soon be provided for women members of the staff in the other two schools. Even more pressing is the securing of salary for either a Chinese Dean of Women or a Chinese Associate Dean of Women, as the present acting-dean must soon lay down executive work. Her furlough is due early in 1927, but the time for taking it may be postponed.

It may seem ungrateful when the women of the American Presbyterian and Methodist Episcopal churches are the only ones as yet fully cooperating in the work of the University to remind them of the fact that even they are far from living up to the proposals made regarding the amalgamation of the North China Union Medical College for Women with the School of Medicine of Shantung Christian University. According to that proposal these two boards should provide six qualified teachers, six nurses, two women with special business training, and one dietician, a total of fifteen. Even if Dr. Shih Isueh Huei and Dr. Yang Chi Ling, resident physicians who are paid from the funds of the women's unit, should be included as supported by these two Boards, the total number now provided is only six, and if they are not included, only a little above a fourth of what was promised is being provided. Two more fully qualified teachers are much needed in the School of Medicine, but even more pressing is the need for nurses - in fact it may be stated without exaggeration that the whole nursing situation is at present in a perilous position. Ten years ago, when the present Hospital was first built and the Nurses Training School established, there ~~were~~ were four foreign nurses on the staff. Today, with all the growing demands of an enlarged medical force and a large increase in the number of patients, and with the immediate prospect of doubling the ward accommodation by the building of the new hospital, there remain but four foreign nurses, one of whom has been crippled by ill-health for the last three years. The Canadian Presbyterian Mission and the Society for the Propagation of the Gospel have both promised us new nurses but in neither case has any appointment yet been made, and the only recruit at present in sight is a nurse who is being sent out by the American Presbyterian Board (North) in the place of Miss Cochran. Unless further help can be speedily secured by the joint action of all Boards interested in our women's work, we shall not only jeopardise the success of our Nurses' Training School, with its splendid past record, but we shall have to face the possibility of being unable to open the new hospital when completed. We earnestly appeal to all co-operating Boards, both in Britain and America, to assist us in averting this calamity.

1926

WIDER COOPERATION IN THE WOMEN'S UNIT

While recognising the fact that our Women's Committee has accepted full responsibility as yet only for the School of Medicine, we cannot present an annual report without calling attention to the grave need of financial support for the women's part in the School of Theology and the School of Arts and Science. A list appended to the report itemizes the needs in dormitory buildings, current expenses and Chinese staff, but under this head we wish to present the need for at least three foreign women members of staff in the departments of education, religious education, and the rural church. In the plans for expansion in these departments, especially in the training of a new type of teacher-evangelist or community worker in rural districts, Cheeloo is attempting a creative task, and without women, both on the staff and in the student body, who can enter the homes and study the rural problems of women and children, the whole program of work will be largely theoretical, and its most important projects will fail of success. We appeal to Boards not yet fully cooperating in the Women's Unit to meet this urgent call. No more pressing appeals come to us than those for women to take responsible positions in churches, and in schools, especially in the lines of religious education both in city and country fields. In the first ranks of Chinese Christian leadership, women as compared with men hardly number one in ten, and while the responsibility in men's work is being transferred rapidly from missionaries to Chinese, no corresponding transfer of women's work within a decade will be possible without great loss to the work. And Cheeloo is the only Christian University now in China where women can get this higher training for service in their mother tongue.

It should be realised that in the Women's Unit only two Boards, the American Presbyterian North, and the Women's Board of Foreign Missions of the Methodist Episcopal Church, are successfully cooperating, the Anglican Mission and the American Board each supplying one faculty member. During the past year the invitation to cooperate has been sent, not only to many Board Secretaries in Great Britain, Canada and America, but to influential missionaries in China, and while the replies received have with one exception expressed the earnest desire to cooperate in the education of women in Cheeloo, present financial stringency seems a bar to its immediate realisation. The possible exception is the American Board, which through its Women's Board of Boston appointed Miss Emma Lueders as its second member on the staff. Some funds toward endowment for a professorship have been secured, and this same women's board has been requested, at the last annual meeting of the North China Mission, to supplement the amount of interest obtained from this fund by adding seven hundred dollars annually, thus providing a salary for Dr. Yang if she later accepts the invitation to join the staff, otherwise it will be available for some other woman member of the faculty of the School of Medicine. We are not without hope that within a year a

sufficient amount may be added to the endowment fund to make the American Board a permanently cooperating body in the Women's Unit. The endowment fund comes from persons who for the present prefer to remain unknown.

It is hoped that every member of the Field Board of Managers will be personally responsible for promoting this wider cooperation in the education of women in Cheeloo, and that this may soon result in the opening of the School of Arts and Science fully to women.

A MIDDLE SCHOOL FOR GIRLS

We would call attention to the fact that there is little prospect of a large increase in the number of women students entering Cheeloo until there is a Senior Middle School for girls which prepares for University entrance examinations. There is now, as far as we know, not a school in the whole northern half of China except in Peking and Tientsin, which would give the student of average ability sufficient preparation so that she would have a fair chance of passing the examinations for the pre-medical course, because of their deficiencies in science-teaching. The exceptional student might succeed in the examinations for the other schools. There are six fine women students in our present sub-freshman class who would probably never have entered Cheeloo had this bridge between the average girls' middle school and the University not been provided, but next autumn there will be no sub-freshman class. Several letters have been received from Shantung, Honan, and Hupeh, asking where their graduates can go for the year of needed preparation, and they are confronted by the two difficulties, the expense of sending girls to Peking or Nanking, and the fact that some of these schools do not meet the Peking and Nanking middle school requirements in English, so not one but two years of added study are required. We submit that the most pressing duty of the University is to provide a solution for this problem, though it would be relieved of responsibility if the English Baptist Mission could see its way in the immediate future to build up a strong middle school for girls which can serve both as a preparatory school for the University and as a practice school for the women students specialising in education and religious education. Another possible solution would be a union school near the University established by the interested missions in Shantung and Honan. Such a school, even if established by the University, should have its separate dormitory, partly because the present dormitory could not accommodate them, but mainly because of the undesirability, in the matter of self-government and for other reasons, of having mature and immature students in the same building. Women members of the staff who would be responsible for the girls should also be added whether or not the middle school of the University is coeducational.

Current expenses of 50 students	1,200	1,000	12,000
		2,100	24,000
			Total \$173,000

standards and methods of all of the mission middle schools for girls in this district can be improved, partly because if relieved of senior middle school work there can be more concentration on the junior middle schools, partly because University women who are trained by practice work in that school can do better teaching in the middle schools.

Residence for teachers

PURCHASE OF SMALL PLOT ADJOINING LEONARD HALL

About two Chinese acres of land, an old Mohammedan cemetery, immediately joining the Leonard Hall and faculty residence sites, which the University was formerly unable to purchase, has been obtained by two members of the Chinese staff who have succeeded in having some of the graves removed. They have expressed their willingness to sell this to the Women's Unit, and as it would be very undesirable to have other buildings erected so near the women's dormitories, we request that you authorize the Women's Unit to secure this small plot if available.

FINANCIAL NEEDS

The Field Board of Managers is respectfully requested to approve, after any modification which may be needed, the following list of Financial Needs of the Women's Unit, as a basis of appeal to Mission Boards and individuals. The estimates are in U.S.A. gold, with exchange reckoned at about 1.75 local currency. Annual Expense Endowment

	Gold	L.C.	Gold
<u>I.</u>			
Endowed professorship, including salary, furlough expenses, travel, with a possible surplus for library of department, etc.			\$50,000
<u>II. General University</u>			
Salary and rent for Dean of Women	\$1,500	\$2,625	30,000
<u>III. School of Medicine</u>			
Salary, rent etc. for Assistant Professor	800	1,400	16,000
<u>IV. School of Theology</u>			
Salary, rent etc. of Instructor	600	1,050	12,000
* Current expenses of 25 students, exclusive of share of teachers' salaries, for expenses in excess of amount covered by student fees, as tuition, heat, light, athletics etc.	600	1,050	12,000
<u>V. School of Arts &amp; Science</u>			
Salary, rent etc. Assistant Professor	800	1,400	16,000
" " " Instructor	600	1,050	12,000
*Current expenses of 50 students	1,200	2,100	24,000
Total			\$172,000

	<u>Gold</u>	<u>L.C.</u>
<u>VI. Capital Expense</u>		
Dormitory for 25 students, School of Theology	\$14,000	\$24,500
Dormitory for 50 students, School of Arts & Science	23,000	40,250
Residence for Teachers	4,000	7,000
Walls, grading etc.	500	875
Dormitory for Girls' Senior Middle School	20,000	35,000
Part share <del>for Girls' Senior Middle School</del> of Middle School Building	12,500	21,875
Total	<u>\$74,000</u>	<u>\$129,500</u>

A dormitory accommodating either 25 or 50 students might first be built for students either in the School of Theology or the School of Arts and Science. There is no need of separating the students of different schools, but certain friends may be more interested in one school than in another. This is the most pressing need, as the present dormitory will barely accommodate all the students who are likely to come in the autumn of 1926. As that building belongs to the School of Medicine, other schools should provide the next dormitory.

\* "Current expenses" might include some added furniture and equipment, needed because of the additional students, but no grant toward board or student aid is included.

In addition to the above scholarships are greatly needed for women students in the School of Theology, and in the Department of Education in the School of Arts and Science..

Respectfully submitted,

L. MINER

Dean of Women.

<u>I.C.</u>	<u>Gold</u>	<u>VI. Capital Expense</u>
\$24,500	\$14,000	Dormitory for 25 students, School of Theology
40,250	23,000	Dormitory for 50 students, School of Arts & Science
7,000	4,000	Residence for Teachers
875	500	Walls, grading etc.
35,000	20,000	Dormitory for Girls, Senior Middle School
21,875	12,500	<del>Part share</del> of Middle School Building
<u>\$129,500</u>	<u>\$74,000</u>	Total

A dormitory accommodating either 25 or 50 students might first be built for students either in the School of Theology or the School of Arts and Science. There is no need of separating the students of different schools, but certain friends may be more interested in one school than in another. This is the most pressing need, as the present dormitory will barely accommodate all the students who are likely to come in the autumn of 1926. As that building belongs to the School of Medicine, other schools should provide the next dormitory.

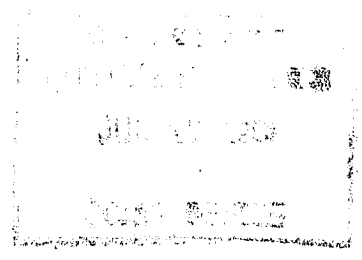

\* "Current expenses" might include some edged furniture and equipment, needed because of the additional students, but no grant toward board or student aid is included.

In addition to the above scholarships are greatly needed for women students in the School of Theology, and in the Department of Education in the School of Arts and Science.

Respectfully submitted,

I. MINER

Dean of Women.

REPORT OF THE DEAN OF WOMEN  
for the year ending June, 1927

SHANTUNG UNIVERSITY

The Field Board of Managers,  
Shantung Christian University.

TRANSFER

May 1927

1927 JUN 26

Ladies and Gentlemen:

This report is written during a two days stay at Tsinan after an enforced absence of five weeks, and as the writer is leaving at once on furlough, it cannot report the last month of the school year. The proportion of women students remaining during the panic late in March and early in June was greater than that of men, but fewer of those who left returned later, so only eighteen are here now. On the seventh of April, when the foreign women teachers all left on consular orders and in accordance with the policy of the University to leave the Chinese executive officers and teachers in full charge, we realized even more keenly than before the great disadvantage of not having a single Chinese woman on the staff. As the campus outside the wall is less protected than the part within the wall belonging to the School of Medicine, the women students all moved to the dormitory of the Nurses Training School, Leonard Hall was locked up, and the keys were formally handed over to Dr. Li Tien Lu, the Acting Vice-president. At the same time Miss Miner handed in her resignation as Dean of Women, not only because she was going on furlough, but in order that those left in charge might be perfectly free to make the best possible arrangements for the women students and for the good of the University under present conditions. This resignation is now formally placed in your hands, with the assurance that if at any time in the future my services for a brief period may be needed as adviser or associate dean of women, they will be given gladly.

A Chinese Dean of Women, and other Chinese Women Teachers.

For the sake of emphasis we place first in our topics the need of a Chinese dean of women. Even before the situation developed which led to the complete evacuation of the foreign staff of Cheeloo, in the booklet "Women in Cheeloo"

the present dean had written:- "In these days of impassioned objection to foreigners serving in executive positions, and still more because one of their own race could understand better the personal problems of the students, and keep more closely in touch with their daily life, we should like to invite one of two or three outstanding Chinese women to take this position. But no invitation can be given until a salary is assured." Because of this pressing need we urge that the Women's Committee of the Board of Governors be asked to set aside \$1500 for this salary for the year 1927-28. The present dean will have left on furlough when this report is presented. It may not be possible to secure a suitable Chinese woman to take this position when the next University year begins, but the provision of a salary should open the way to this if the woman can be found.

In addition to the Dean, it is hoped that at least two Chinese women physicians will be added to the staff whose salaries can be paid from the appropriation made by the Women's Committee toward the running expenses of the School of Medicine, or if that is not sufficient, that one of the salaries provided for a foreign physician can be used for this purpose. If these two women can be secured

MAY 1927

and Dr. Marion Yang, whose salary would be provided by the American Board, consents to join the staff, a fine beginning will be made toward the end which we should have in view, namely having at least half of our staff Chinese. The need of women teachers in the School of Arts and Science and the School of Theology was mentioned in last year's report, and is felt more deeply now that it has been necessary to leave the women in the two schools for over two months entirely in the charge of men teachers. They have carried the responsibility most willingly and successfully, but it is not right to ask them to continue to carry it.

**Our Foreign Staff** We are most happy in the four members who this year have been added to our number. Miss Frances R. Wilson of W.F.M.S. became a member of the staff in April, but because all foreigners were leaving Cheeloo she remained at her work in Peking. Under her leadership it is hoped that work in the Department of Nursing Education will improve both in quantity and quality, by the adding of more advanced courses. There are two other additions to this department, Miss Mary E. Vanderbilt, supported by the American Presbyterian Board, and Miss Dorothea Reade, supported by the Society for the Propagation of the Gospel, both of whom are still in the Language School, as is Dr. Arabella S. Gault, the only woman physician to join the staff this year.

Against these gains we must balance several departures, the return, in one of two cases being uncertain. In March Dr. Helena Wright of the S.P.G. went on furlough, and at the first of April Dr. Heath left with her mother for America. Dr. Morgan also left in April on regular furlough. Four from the nurses' staff also went home, the Misses Dinkelacker for furlough in America and Miss Logan, who had just returned from furlough, to England with Miss Pollard, whose ill health will make her return the coming year impossible. Dr. Scott and Dr. Waddell have gone to Korea for several months, where Dr. Scott is at work in the Presbyterian Hospital in Seoul, and Dr. Waddell is working on lecture and the Chinese language.

**New Members of Foreign Staff Needed.** The above paragraph shows that the quota of women members of staff for which the Women's Committee is responsible will not be full, moreover the time when enlargement was expected has come, and new departments of work should be opened. We urge the appointment at once of at least one more foreign woman physician.

More foreign women nurses are also urgently needed, as is shown in last year's report.

At the November 20th, meeting of the Council of the Women's Unit, it was "Voted: that the Council would earnestly request the National Committee of the Y.W.C.A. to give favorable consideration to the possibility of assigning Miss Catherine Vance to the University to assist in the training of students for social and religious service." The National Committee, while reluctant to release one of their most valued workers, express their willingness to do so for this work which appeals strongly to Miss Vance, but because of financial straits they are unable now to provide her salary. Therefore, we wish also to have the name of Miss Vance presented to the

Women's Committee of the Board of Governors, and hope that the securing of her salary, either within or without the present quota, will receive their early attention. Miss Vance went to America on furlough last January.

**New Courses for Women.** In the preceding paragraphs mention has been made of new courses for women which Cheeloo, with her desire to minister to the needs of the Christian community, should provide. One type would perhaps call for the establishing of a new Department for the Training of Community Workers. Some students in this department would major in Public Health, others in Social Work, a third line would give special attention to Religious Education, while also taking courses in the other two lines. This department would be linked up with all three Schools, and would not call for much additional class room teaching, and would also be connected with either the city or the rural extension departments. It is to this department that we should like to have Miss Vance appointed.

Four new courses would classify in the Department of Nursing Education.

(1) A five years course combining the advantages of college studies with general and professional training, leading to a diploma in Nursing and a Bachelor of Science degree from the University.

(2) Course for Community Nurse, combining religious, social, and public health training with ordinary lines of nursing. Probably there would be two grades, University and Senior Middle, and two types, urban and rural.

(3) Courses in administration.

(4) Course in Teacher Training for principals of Nurses Training Schools.

A Course in Home Economics should also be added. This would coordinate with the courses already mentioned. The November meeting of the Council of the Women's Unit recommended for this line of teaching the appointment of Mrs. Donald Hsueh (née Catherine Ling) who is now studying in the University of Chicago, but expects to return to China this summer.

**Middle School for Girls.** If any words would increase your realization of what was said a year ago about the importance of having a Senior Middle School for Girls in connection with the University, half of the space of this report might well be given to the subject. Each time that the registrar has to handle the problem of the woman student who can find no school which will fit her to take the University entrance examinations, this need is realized afresh. And the increasing number of women in the Department of Education in the University makes the need of this middle school as a practice school more evident.

**The New Hospital** The report of the Dean of the School of Medicine explains the delay in building the new hospital, which is the generous contribution of the Women's Committee to the plant of that School. When the revolution in China has completed its work, we hope that the building can proceed rapidly, for

MAY 1927

this hospital is sorely needed for our present work, and none of the new courses mentioned above can be added until this hospital provides room for expansion.

Visit of Mrs. Roys The first visit of a member of the Women's Committee since women students were admitted to Cheeloo was fittingly celebrated when Mrs. Roys entered the campus one October evening, by exploding firecrackers and a row of happy singing girls with lanterns of welcome. The women students still remember with pleasure the social and inspirational contacts of those few days and we of the staff greatly valued her wise counsels and understanding sympathy. We hope more of you will come, and will see that we really need the things for which we are asking in these reports.

Financial Report The financial report to be presented by Dr. Heath or Dr. Waddell will contain not only the expenditures for the current year and the budget for the coming year, but suggestions as to the use of the increased appropriations from the W.F.M.S. and the Presbyterian Board in 1928, when \$8,000 will be due from each Board annually. Some of this should go toward the expansion of work in the Department of Nursing Education, as desired by Miss Wilson and this report of the Dean of Women suggests other lines probably much in excess of the expected income.

Our Women Students and Their Life Perhaps this report has looked too much into the future so we now give a few facts relating to the past year. 53 women students attended the autumn semester, three of whom graduated in January, two from Medicine and one from Theology, and a few dropped out, so as only two new women were received, the number the second semester was 48. 18 were in the School of Medicine, 3 in the School of Theology, and 32 in various departments of the School of Arts and Science, (9 in the regular classes, 16 premedical, 1 pretheological, and 6 "specials" in education). We have had an exceptionally fine, earnest group of young women this year, as is proved by their keeping their minds on their work in spite of reports of the devastations of war and bandits at the homes of many of them and of personal dangers threatening nearer at hand. Their Self-government Society had to take on only a little added responsibility when the Dean of Women and all the other women teachers left early in April, and on her return in May, there was the cheering report that only one minor case of discipline had been taken up by Dr. Li, and that indiscretion was committed by a girl who had only been in the school a few weeks. In the group of women students 12 of the 22 provinces and Korea are represented, also fourteen different missions and thirty secondary schools or colleges. Presbyterians number 14, Congregationalists 10, Methodists and Lutherans 9, other denominations have smaller numbers, and there are three non-Christians.

In attendance on the voluntary chapel and church the average is about two-thirds, a better proportion than of the men students, But time for religious life and service is much abridged by the

MAY 1927

- 5 -

stringent demands of the curriculum and the increasing enticements of University social life, with its many clubs and organizations. Many of these are educational, in a broad sense, but they increase the expense and complexity of life.

In community service more than half of the women have given generously of their time, chiefly under the direction of their own Y.W.C.A. For the second time since the three University Y.M.C.A. Associations united with the Y.W.C.A. to form a University Students Christian Association three years ago a woman has acted as president. The local Sunday School for children and a nearby camp for 5000 women and children from districts devastated by floods or bandits, have been their main fields for work.

Our Second Greatest Material Need. It is a question whether the beginning or the end of a report calls attention most effectively to a subject, but having placed the need of a salary for a Chinese Dean of women at the beginning, there is no question about placing the need of a second dormitory at its close. We hope within a few years to have two more dormitories accommodating in all from 75 to 100 students. We would like gold \$20,000 to begin building in 1928 for the new students whom we should have been unable to accommodate this coming autumn had normal conditions prevailed. Leonard Hall has been practically full this year, and the revolution has given only a temporary check. Even in this year of war and financial stress twenty-five new women students came to us, and those of us who believe in the better days which are coming for women in the new China should give hostages to hope in the shape of a dormitory for the women who will come to Cheeloo.

TRANSFER

SHANTUNG

REPORT OF THE ACTING-DEAN OF WOMEN

for the year ending JUNE 1928

*See New Year  
Report of 1928*

To the Field Board of Managers:

Ladies and Gentlemen,

As my appointment to this office was made in September 1927 this report covers a period of only nine months. In many respects these months have been occupied by watchful waiting and therefore are not full of material for a Dean's Annual Report. In another sense, these months have developed realizations of what we have, and convictions of what we need; and they have given us an opportunity to know more thoroughly what we require for the development of women's work in Shantung Christian University. The following report contains repetitions from previous annual reports of the Dean of Women. These are made in the hope that they may carry the weight of repetition for the sake of emphasis.

OUR WOMEN STUDENTS AND THEIR LIFE - The fall term  
1927 found  
forty-eight

women enrolled in our University -

School of Medicine .....	14
Pre-medical Department .....	13
School of Arts (Education & Specials)	17
School of Theology .....	4

Four of these women graduated from the School of Medicine in January 1928. Two were unable to register for the spring term because of ill-health. Four new students joined us for the spring term, so we have kept up about our usual enrolment throughout the whole year.

In June 1928 three women should graduate from the School of Medicine and one each from the Schools of Arts and Theology.

As a whole, women students in the University have stood well in their scholastic work. They have given liberally of their time in caring for the 500 Famine Refugee children under the supervision of the University Famine Refugee Committee.

Although lacking the inspiration of Mrs. Shields' leadership, the women have continued their work in the Sunday School of the South Suburb Church, and in our hospital wards. Regular University Y.W. activities and Bible classes have continued throughout the year.

As a student group, our women have made great progress along the lines of self-reliance and discriminating judgment since the period when I acted as Dean of Women in 1925. In adjusting themselves to the requirements of a co-educational school one feels that these women are getting training which is fitting them to take their place in the constructive forces of China.

During the year, this office has received many more requests for trained women than can be filled by our graduates of the year. These requests have been for physicians, teachers of college science, Y.W. Secretaries and instructors for Bible Training Schools.

CHINESE DEAN OF WOMEN AND OTHER  
CHINESE WOMEN TEACHERS.

- A Chinese Dean of women has not yet been secured. Despite efforts to fill the office, we find ourselves in practically the same position as at this time last year. We are expecting Dr. Miner to be able to assist in accomplishing this aim when she resumes the deanship.

Dr. Marion Yang was invited to join the Department of Obstetrics and Gynaecology as Assistant Professor at a monthly salary of \$150. In replying to this invitation Dr. Yang said that she could not now see her way clear to come to Tsinan. We are very sorry that Dr. Yang could not accept this appointment, as we are in great need of a woman to head this department. We have long expected Dr. Yang to join our staff, and had hoped she would be able to do so at this time.

Miss Wang Hsueh Chen, who is expected to graduate from the School of Arts & Science this June, has accepted a teaching position in the University Middle School.

OUR FOREIGN STAFF - We have were very happy to have Miss Logan return in December 1927.

Miss Frances R. Wilson arrived in September 1927 and immediately assumed her duties as Superintendent of the School of Nursing. The Nurses' Training School class work necessarily omitted during the five months of evacuation has been made up and the three years schedule carried during this year.

Miss Mary E. Vanderbilt joined the staff of the School of Nursing in October 1927 and Miss Dorothea Reade came to us in March 1928.

We have to report that two other nurses, Miss Mollie Townsend and Miss Carol Brodie, are under appointment to join the school of Nursing this year. A strong effort is being made to secure Chinese graduate nurses. Five Chinese graduate nurses have acted as ward supervisors this year.

Dr. Arabella S. Gault joined the medical staff in September 1927. Dr. Gault has spent the year in the Department of Internal Medicine and in language study.

For many reasons we wish to express our appreciation of the valuable services of several women who were unable to reach their respective stations this year.

Dr. Mary F. Gell has had charge of the hospital and O.P.D. Obstetrical and Gynaecological work since Dr. Shields' departure in January.

During the spring term, Dr. Margaret Forster has been given much needed assistance in the Department of Internal Medicine.

Miss Isabel Garnett and Miss Margaret Smith have been given much needed assistance in the School of Nursing.

Miss Lois Young spent the fall term teaching English in the Training School for Nurses and in the University Middle School.

We have been most happy to have these women with us during their enforced absence from their stations. We wish to express our gratitude to the respective missions who assigned these workers to help us during this year when our staff was depleted.

We regret to have to record the resignations from the staff of the University Hospital and School of Nursing of the Misses Binkelacker and Miss Ethel Pollard, and from the staff of the Medical School of Dr. Helena R. Wright. We appreciate deeply the valuable services which they have rendered in the Hospital and Medical School in the years in which they have been associated with us, and are exceedingly sorry that they are unable to return to us.

Dr. Luella Miner has been absent on regular furlough. She had hoped to return in January, but, on the advice of her physicians, she now plans to remain away from China for a year. Latest reports indicate that Dr. Miner is feeling very well physically and expects to be with us for the opening of the autumn term this year.

Dr. Julia Morgan has also been absent on regular furlough for a year. She expects to return to her work in the Medical School and Hospital next November.

Dr. Frances Heath writes that she does not see her way clear to return to China for the present.

NEW COURSES FOR WOMEN - The School of Nursing feels that the time has arrived for the beginning of part of the work outlined under this heading in the Report of the Dean of Women of June 1927. Applications secured during the year indicate that women prepared to take this work are now seeking places where they may receive the training which such a course would give them. We hope that students may be admitted to this work in September 1928.

MATERIAL NEEDS - At present the Women's Unit does not feel it is wise to change the requests for financial needs in developing the women's work. These needs, as previously stated are:-

SOME OF THE FINANCIAL NEEDS OF THE WOMEN'S UNIT  
SHANTUNG CHRISTIAN UNIVERSITY  
A ROUGH ESTIMATE IN U.S. GOLD.

I. CAPITAL EXPENSES

	<u>Gold</u>
1. Dormitory Accommodations for women students in Schools of Arts & Science, and Theology .....	\$37,000
2. Teaching Units and further Dormitory Accommodations in the Nurses' Training School, and the provision of residence for Women Internes .....	25,000
3. Residence for 3 or 4 Teachers .....	4,000
4. Walls, Grading, etc. ....	500
5. Dormitory and Land for Girls' Middle School .....	20,000
	Total
	\$86,500
	<u>Annual</u> or <u>Endowment</u>
	<u>Exp.</u>

II. SCHOOL OF THEOLOGY

* Current Expenses of 25 students .....	\$500	\$10,000
Chinese Woman Teacher, with house rent.	300	16,000

	<u>ANNUAL</u> <u>EXP.</u>	or <u>ENDOWMENT</u>
<u>III. SCHOOL OF ARTS &amp; SCIENCE</u>		
* Current Expenses of 50 students .....	\$1000	\$20,000
2 Chinese Women Teachers, with house rent .....	1000	32,000
<u>IV. GENERAL UNIVERSITY</u>		
# Salary & rent for Dean of Women .....	1000	20,000
Total	<u>\$4900</u>	<u>\$98,000</u>

Current Expenses would include in this case some added furniture and equipment, needed because of the additional students, and the added expense above that covered by fees for tuition, room, heat, lights, etc. paid by the students. No grant toward board or student aid is included. At present the current expenses of women students in the Schools of Arts & Science and of Theology are met by the Medical School. This should not continue and for this reason we feel this is one of our very urgent needs.

# This amount can be reduced if, to the capital expense above is added another residence for the Dean containing rooms to be used for administrative purposes, the cost to be about the same as for the other residence.

In addition to the above, scholarships are greatly needed for students in the School of Theology and in the Department of Education in the School of Arts and Science.

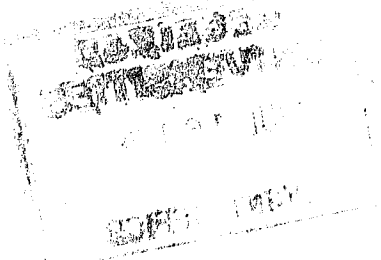

If added funds can come in the form of endowment the University will be greatly strengthened.

A dormitory accommodating about 50 students might first be built for students either in the School of Theology or the School of Arts & Science. There is no need of separating the students of different schools, but certain friends may be more interested in one school than in another. This is a most pressing need, as the present dormitory will hardly accommodate all the students who will want to come next autumn, and as that belongs to the School of Medicine, other schools should provide the next dormitory.

Respectfully submitted,

(Signed) A.V. Scott,

Acting-Dean of Women.

1931

SHANTUNG  
REPORT OF THE DEAN OF WOMEN  
CHEE LOO UNIVERSITY

June 1931

&

To the Board of Directors,

Ladies and Gentlemen,

The year which has just closed has been one of unexpected success and joy following the tragic fighting between North and South in the summer of 1930. In spite of local disturbances the girls have courageously given attention to their studies. There was considerable difficulty for some of the girls in returning to their homes last summer, as the trains on the main line were not allowed to pass either Nanking or Tientsin. For this reason the students were compelled to go to Tsingtao and take boats in order to get to their respective homes.

LAST YEAR'S GRADUATES - Our women students who graduated in June 1930 have all held responsible positions this year.

Dr. Ch'en Shu Wo is an assistant resident in our own hospital. She is doing fine work with Dr. A. V. Scott. Dr. Ch'en Jui Tzu is doing advanced work in P.U.M.C. and is coming back to us this fall as Senior Assistant Resident in the hospital. Dr. Chin Wen Chieh is working in the Central Hospital at Nanking. Miss Wu Yü Lan is with the American Board Mission at Taiku, Shansi. Her work is mainly that of visiting the women church members. Miss Yang Jui Ling is with the Society of Friends at Shou Chou, Anhui. Miss Wang Li Tien is in the girls school at Shou Chou, Anhui, and is going to visit her Alma Mater and join three of our girl students in the Goodwill Tour to Japan. Miss Yang Chu I is in the girls school at Panchou, Shansi, and is expecting to sail for America for advanced study.

OUR WOMEN STUDENTS - There are three women students to graduate in June, one from the School of Medicine and two from the School of Arts. All of them have positions awaiting them. The School of Theology has been separated from the University, but five of the girls who are studying Theology are housed in Leonard Hall. Many letters are on file asking for women graduates from all three schools. Unfortunately we cannot meet these demands. There is no doubt a great need for increasing the numbers of our women students if we are to supply such demands. We all hope to see the school registered and this will no doubt make possible the large enrolment we desire. Of actual University students there were thirty-five in residence during the Autumn semester, and forty during the spring, divided among the schools as follows:-

	Autumn 1930	Spring 1931
School of Medicine	14	14
School of Science	8	10
School of Arts	10	10
Special Students	<u>3</u>	<u>6</u>
Totals	35	40

RELIGIOUS AND SOCIAL LIFE - All the women students in the University with the exception of a very few are members of Christian Churches. A Bible-class on Sunday under the leadership of Mr. Lautenschlager is open to both men and women. Different speakers are asked to give addresses on religious or other subjects. The membership of the Y.W.C.A. is still small but the spirit of the little group is sound. This is the only religious organization among the girls. A half-hour meeting was held daily by the Y.W.C.A. On Easter morning a service was held in the south courtyard of Leonard Hall, at which an inspiring address was given by Mr. Lautenschlager.

The social activities include clubs, class meeting, and a literary society. The International Friendship Club was newly organised last fall. It is open to both teachers and students. A series of lectures has been delivered by teachers of the University, the local Commissioner of Education, the Japanese and German consuls and other prominent men from out of town. Some members of the International Friendship Club are planning to visit Japan this summer, expecting to see the work of Dr. Kagawa. They also hope to take a short course in a Japanese University. Three of our girls have been elected to join this group. We all hope this visit will promote understanding and goodwill between the students of the two countries.

FUTURE FINANCIAL NEEDS - As soon as the school is registered one most immediate need from the financial standpoint will be funds with which to build a new dormitory. The present dormitory accommodates only fifty or fifty-five students. If we should have the school registered this year the dormitory will no doubt be filled to its capacity, so a special fund for a new dormitory is very much desired for the coming year.

DEPARTMENT OF NURSING - With the enrolment of the new class in September 1930 the school consisted of the following:-

First Year students	7
Second " "	5
Third " "	6
Fourth " "	15
Graduates finishing practice	<u>12</u>
Total enrolment	45

During the year 13 graduates have been employed (5 men and 8 women). Of these two resigned and one discontinued because of illness. Eleven months of graduate practice have been given to graduate nurses, one of our own alumni and three from the schools.

Diplomas were granted to all graduates who have gone into work as follows:-

8 into Hospital positions  
2 into public health work  
1 into school nursing.

The teaching staff lost one member by marriage in December and acquired a new one at the New Year, who is giving half-time to language study.

The comfort of the Chinese graduate nurses has been greatly increased by the use of House No. 44 as a residence.

If there is any growth next year we feel that a dietetic laboratory should be the first addition. We are looking to the University's household economics department to aid us in our five-year course. We want this as a foundation for the present course also. This five-year course is offered for this autumn and there are some applicants already interested.

HOPE FOR THE FUTURE - It has been such a joy to have a share in this great enterprise. The most joyful thing is to see our women students preparing themselves for a great future. There are many women in China whose unfortunate lives are waiting for trained Christian leadership. We expect the women of Cheeloo to be prepared to meet this need.

L. H. L. Hui

SHANTUNG

June 1932

REPORT OF THE DEAN OF WOMEN

CHEELOO UNIVERSITY

1931 - 1932

To the Board of Directors:

Ladies and Gentlemen,

During the past few years, as we have reported, the work of our school has been disturbed by either internal or external incidents. The serious Japanese military invasion of the three eastern provinces of China and the destruction of life and property in Tientsin and Shanghai made the blood of the students boil. In spite of local disturbances, owing to student organizations demanding a trip to Nanking to influence the Central Government to use force with Japan, our students quietly, patiently, systematically and courageously went on with constructive work. Our girls also contributed their time and thought to this particular work. For special reasons our school, as well as the other schools in the province, had to be closed for over a month in December. Our girls had to leave the dormitory and go back to their respective homes. There were about thirty girls whose homes were too far away, so they were taken into the homes of both Chinese and foreign faculty members. Although there have been these times of anxiety yet we had a year's work with unexpected success and joy.

ENROLZMENT - We are very much pleased with the increase of women students this year.

Every year we have many letters on file asking for women graduates from all three schools. Now that our school is registered there will no doubt be a large enrolment this fall. We certainly hope that in the near future we shall have more women graduates to meet these demands. Of actual university students there were seventy-two women in residence during the autumn semester, and sixty-four during the spring, divided among the schools as follows:-

	<u>Autumn 1931</u>	<u>Spring 1932</u>
School of Medicine .....	19	19
" " Science .....	22	19
" " " special students .....	4	2
" " Arts .....	13	11
" " " special students .....	11	10
" " Pharmacy .....	3	3
	<hr/>	<hr/>
TOTALS	72	64

There was also one graduate nurse from a Canton mission hospital who has taken a six months course in massage during the year.

L. J. L. Yui

# SHANTUNG

REPORT OF THE DEAN OF WOMEN

Recd 6/14/33

1932 - 1933

To the Board of Directors and  
the Board of Governors:

Ladies and Gentlemen,

In glancing over the year it is with a feeling of thankfulness that we have been allowed to carry out all we had planned at the beginning of the autumn semester. Although at this time of the Japanese invasion of North China as far as Tientsin and Peiping, and the actual evacuation of the American School students from T'ungchow, which is a distance of about 13 miles from Peiping, other schools and universities in that vicinity were unable to carry on, we fortunately have been able to pull through and carry on till the end of June.

**THE IMPORTANCE OF EDUCATION FOR WOMEN** - On account of registration last year, which has increased attendance, the latest statistics show a total enrolment of student in all colleges, of 17,215. According to the population of the country, the average is one person out of 23,000 who has the opportunity of securing a college education. As a matter of fact, women still have the least opportunity. I feel that those who have the direct responsibility of guiding, educating and moulding the lives of the new generation of women should be encouraged to try to help them in every way to secure higher education.

**ENROLMENT** - The enrolment of our women students may be tabulated as follows:-

	<u>School of Arts</u>		<u>School of Science</u>	
	Autumn 1932	Spring 1933	Autumn 1932	Spring 1933
Senior	2	2	1	0
Junior	4	4	1	2
Sophomore	8	8	10	9
Freshman	13	13	12	12
Special	13	13	1	0

### School of Medicine

	Autumn 1932	Spring 1933
5th year	3	3
4th year	3	3
3rd year	3	3
2nd year	4	4
1st year	3	3
Pharmacy	3	3
Electrotherapy	3	3

Total in three schools: Autumn 87, Spring 85

GRADUATES -	Autumn 1932	B.S.	1
	Spring 1933	B.A.	2
		M.D.M.M.	3

Total 6

RELIGIOUS & SOCIAL LIFE - All the women students in the University with the exception of about a dozen, are members of Christian Churches. Bible classes are open to all students on Sunday, and were led by professors or their wives who had deep religious experience.

Social activities took the form of Class Meetings, an English Club, Literary Society, International Friendship Club etc. From these activities there is definite growth of the spirit of co-operation, self-respect, self-control and of higher ideals of service.

CHINESE WOMAN TEACHER - So far as this hope is concerned, we expect to have one with us in the fall. It will be a great help to the girls and also to our teaching force.

FINANCES - The finances of the Women's Committee are in charge of the University Treasurer, who will report the details of the financial standing of the Women's work.

NEW DORMITORY - Our women students have been increasing during the past two years. On account of the limited capacity of Leonard Hall we were fortunate to be able to rent the Anglican Hostel, formerly occupied by Anglican men students, for one year. We have hoped for a long time that a new dormitory would be built to assist the development of the women's work, and we are too glad for words as we see the two-story building nearing its completion. On account of financial depression we have to count our dollars in order to get the most out of the least. The fund for this building is the accumulation of the interest on a bequest from the Hall Estate, designated to the women's work of the Schools of Arts and Science. The whole cost of this building amounts to \$22,000 Mex. and it will accommodate fifty students.

DEATH OF MISS JEN KUO TUNG - Miss Jen, a student who was studying in the first year of her pre-medical course in the Science College, died on May 26th. Miss Jen was admitted to the University Hospital on February 28th, suffering from tuberculosis, and after three months of great suffering, bravely borne, she passed to the other side.

L. H. L. YUI

L. H. L. J. J. J.

STAMPED

6/30/34

REPORT OF THE DEAN OF WOMEN

June 1934

To the Board of Directors and the Board of Governors:

Ladies and Gentlemen.

MINER HALL - For several years we have been hoping to build another girls' dormitory, as each year there are more girls wanting to come to Cheeloo than we have room for. We are all very happy that we were able to build our new dormitory last Fall at a cost of twenty-two thousand dollars Mex. The building is simple but practical and accommodates fifty-three students. It is named Miner Hall in remembrance of Miss Luella Miner.

ENROLMENT - The enrolment of women students may be tabulated as follows:-

	<u>School of Arts</u>			<u>School of Science</u>			<u>School of Medicine</u>	
	Autumn	Spring		Autumn	Spring		Autumn	Spring
Sen.	2	2	Sen.	3	3	5th yr.	3	3
Jun.	8	8	Jun.	1	1	4th "	3	3
Soph.	9	9	Soph.	8	8	3rd "	4	3
Fresh.	14	13	Fresh.	19	19	2nd "	3	3
			Pharm.	7	7	1st "	6	6
						Electro-therapy	3	0

Total in three schools: Autumn 1933 - 93  
Spring 1934 - 88

GRADUATES -

Autumn 1934	B.A.	2	
	B.S.	1	
	M.D.	3	
Spring 1935	B.S.	2	Total 8

In the autumn of 1933 there were 102 students living in the two dormitories. These included the women in the Theological School. All of them are very nice girls and hard workers. I find great pleasure in working with them.

It is a privilege to see the girls improve in their way of living. How wonderful to think that we are trying to turn out girls from our university to be leaders among the women of China. China's future lies with the type of girl whom we are trying to train in Cheeloo, with the spirit of Jesus, ready to sacrifice and ready to serve.

RELIGIOUS AND SOCIAL LIFE - The most successful development of the religious life among the student body is

the unification of the eight Bible Classes, open to both men and women students. The Union has had two retreats during the year. The members have also been responsible for two of the Sunday morning church services which were most interesting and inspiring. The women students Young Women's Christian Association has also been active this year.

Social activities have taken the form of class meetings, English Club, Literary Society etc. In these activities there has been a definite growth of the spirit of cooperation, self-respect, self-control and of higher ideals of service.

REPORT OF THE DEAN OF WOMEN  
CHELSEO UNIVERSITY  
For the year ending June 30 1936

To the Board of Directors:-

Ladies and Gentlemen,

No words can express how happy we are to have our new president, Mr. Shuming T. Liu with us this year. He has been kind and helpful in every way to lead us out of difficulties and anxieties. He is interested in life of students in many ways and is always thinking and planning for their best interests. Certainly, the Dean of Women has received great help from him and her burdens have been much lightened. We wish for his good success in his service for Chelsoo and her young people for many more years to come.

We are thankful that we have been able to carry out all we planned at the beginning of the autumn semester, although the work of the school has been disturbed by internal and external incidents.

Enrollment: There were enrolled during the autumn of 1935 a total of 123 women, and 136 during the spring of 1936, not including the girls in the School of Theology.

The number of girls is increasing each year, so that our dormitories are already filled to capacity. As a rule two girls occupy one room, but on account of the lack of space we are planning to put 4 girls into the larger rooms. It was only two years ago that Miner Hall was erected, but now we need a third dormitory very badly. For the sake of encouraging women to seek higher education, I hope the board will see our needs and try to obtain for us a third dormitory in the very near future.

Dean of Women

RECEIVED  
UNIVERSITY  
JUL 10 1936  
JUL 10 1936

REPORT OF THE DEAN, SCHOOL OF MEDICINE,  
FOR THE YEAR ENDING JUNE 30, 1936.

To the Members of the Board of Directors:

Ladies and Gentlemen,

Work has been carried on as usual during the year, though a certain amount of rearrangement of the time-table was necessitated on account of the longer winter vacation ordered by the Ministry of Education. Most of the time thus lost was made up, by cutting out the spring holiday and various odd holidays.

The work of the third year has been cut short by a month, in order to enable the students to attend the military medical training camp in Nanking from May 27 - July 27. This has meant the postponing of some of their examinations until the autumn.

STUDENTS. The number of students enrolled during the past year was 99, of whom 24 were women.

The graduating class this year consists of 16, 3 of whom are women. We regret to report the death, in January, of one member of this class. After graduation, 6 members of the class are remaining in our own hospital, 6 are going to mission hospitals, 1 to the Central Hospital, Nanking and 2 to the P.U.M.C. As usual, the demand for our graduates, and especially for women, is far greater than the supply.

SPECIAL COURSES

Pharmacy. A new class of 21 students, 15 men and 6 women, was admitted last September, for the 2-year course in Pharmacy.

Laboratory Technique. Last year's class of 4 students (and 2 special students) completed the course in March and a new class of 4 was admitted. There is always a long waiting list for this course, as, owing to shortage of staff and of accommodation, it is not possible to admit more than 4 students to the regular class each year. It is hoped that, in time, it may be possible greatly to enlarge the scope and usefulness of this course.

Electro-therapeutics & Massage. On account of the absence on furlough of Miss Mann, no class has been held during the past year, but it is hoped to admit a new class in September.

MEDICAL CARE OF FLOOD REFUGEES. In October last, the China International Famine Relief Commission and the local municipal government asked Chee-lee Medical School and Hospital to undertake the medical care of the 19,000 flood refugees, distributed in 27 camps in and around Tainan. The whole staff and student body were organized into 11 groups, each of which took charge of two or more camps, which they visited at least twice a week, doing vaccinations and treatments of minor ailments. Patients requiring more attention were sent to the out-patient department or admitted to hospital.

This work, which lasted till the end of March, while providing good experience for the students, proved a heavy burden for both staff and students, being in addition to the regular schedule of teaching and hospital work. However, it is felt to have been well worth while.

STAFF. Dr. Shields has been on furlough throughout the year, and it is hoped that he will return in the autumn.

From July to September 1935, Dr. Ming had leave of absence to attend the International Physiological Congress in Russia.

During the year, Dr. Ingle, as Acting Associate Dean, has helped in the work of the Dean's Office. This summer he is taking three months of his furlough, postponing the remainder to a later date, and, during his absence, Dr. Price will take over his duties in the Dean's Office.

Dr. Smyly is also leaving in June, for six months' furlough.

Mr. Wolfe, whose furlough was due last year, could not be spared until the building of the new hospital wing was completed. He was able to leave in March of this year and expects to return at the end of December.

Dr. Ch'en Yen Ping has received a fellowship from the China Foundation, for study in America, and expects to leave this summer for Chicago, where he will do special work in Physiology in Northwestern University.

Drs. Lang, Lin and Morgan returned from furlough in the early autumn. Dr. Cell is expected to return in August of this year.

The death, last October, of Dr. Susan Waddell Hou, for many years a member of the faculty of the Medical School, came as a great shock to the staff and student body.

It is with great satisfaction that we are able to report the appointment to the staff of the School of Medicine, by the Methodist Missionary Society, of Mr. Stanley H. Prescott. Mr. Prescott is a physiologist and pharmacologist and has had valuable experience in teaching these subjects in England. It is hoped that Mr. Prescott will arrive on the field in the autumn.

Dr. Evans left for the United States, on special leave of absence for family reasons, last November and it is hoped that he will return before the opening of the autumn term.

PUBLIC HEALTH DEPARTMENT. There have been several changes in the staff of the Public Health Department during the year. As Dr. Yao Hsin Yuan expected to be away in the northwest during the greater part of the year, on work connected with the National Health Administration, Dr. Sun Chia Ch'i was appointed, in September, to take charge of the work of the department. Dr. Sun rendered valuable service in connection with the flood relief work during the winter. He left in March, to take up an appointment in the Sei Sheng Shu. Dr. Ch'en Chi Li also served for a short time in the department during the spring.

In March, Dr. Struthers was appointed Acting Head of the department and he is now endeavouring to secure an assistant to take charge of School Health work, which the Medical School has undertaken in conjunction with the Municipal Government, in the city and in a neighbouring country district. Visits were recently made to this district by the Public Health staff and students of the third year, and 2500 children in 54 schools were examined.

The Public Health Department has also taken charge of the clinic at Lungshan during the past year.

At the request of the Wei Sheng Shu, lectures on public health and military hygiene are being given by Dr. Kiang to the students in the military training camp at Heinchuang during May and June.

VISITING LECTURERS. During the year, Dr. J. P. Maxwell, of the F.U.M.C., gave his annual course of lectures to the students and staff of the Medical School.

POST-GRADUATE COURSE. On account of the extra work entailed by the care of the refugee camps during the winter, no post-graduate course was given this year.

COUNCIL ON PUBLICATION. The work of the Council has been carried on as usual in its headquarters in the School of Medicine. The resignation of Dr. McAll from the position of Editorial Secretary and from the faculty of the School of Medicine was received last autumn with great regret. Mr. T. C. Lee, who had been acting as Editorial Secretary of the Council during Dr. McAll's absence on furlough, was appointed Editorial Secretary of the Council, Dr. Ingle continuing to act as Treasurer.

The following books have been published by the Council during the past year:-

- Practical Anatomy (Cunningham) Vol. II ..... Mr. Lee
- Physiotherapy ..... Miss Nunn & Dr. Ingle
- Hare's Therapeutics (revised & enlarged) ..Dr. Ingram & Dr. Lee
- Pathology, Stengel, (reprint) .....Dr. McAll
- Clinical Methods, Hutchison & Hainy (reprint) Dr. McAll
- Care & Feeding of Infants & Children (revised & enlarged) .....Dr. Schott and Mr. Lee
- Laboratory Manual of Bacteriology .... Drs. C.E. Lim & T. Li
- Veneral Diseases; Surgeon General, U.S. Army, (revised) ..... Dr. T. Stearns & Mr. Lee

The following books are at present in the press:-

- Medicine, Wheeler & Jack, 1st half ..... Dr. McAll
- Materia Medica, Bruce & Dilling, ...Mr. Pailing & Mr. Liu Kuo Hua
- Practical Anatomy, Cunningham, Vol. III ..... Mr. Lee
- Halliburton's Physiology (revised) ..Dr. Y.P. Ch'en & Dr. Evans
- Operative Surgery, Miles & Wilkie..... Dr. Ingle

The following books are at present in process of translation or preparation:-

- Pathology, Delafield & Prudden ..... Dr. Hou
- Synopsis of Medicine, Tidy
- Human Parasitology, A Guide to, Blacklock & Southwell
- Surgical Diagnosis, Shattock
- Ear, Nose & Throat, Turner
- Embryology & Developmental Anatomy
- Bacteriology, Zinsser (revision)
- Appendix to Kay's Eye Diseases
- Appendix to Medical Lexicon

NEW HOSPITAL AND OUT-PATIENT DEPARTMENT. The new out-patient Department was opened to patients in September 1935, and the Hospital wing a few weeks later, and both are proving very satisfactory. As yet, the income from the increased accommodation does not equal the expenditure, but it is hoped that this will gradually improve until the hospital becomes self-supporting.

Dr. Price's term of office as Hospital Superintendent expired at the end of February and, as he did not wish to continue in this position for a further term of service, Dr. King was appointed Superintendent for the period from March to December. A committee was appointed to bring in recommendations in regard to a permanent Hospital Superintendent.

Various alterations have been made in the old hospital and out-patient department, the Pathology department having been moved to the westlower ward of the old hospital, thus giving larger and more convenient accommodation for the Pathological Museum, whilst the Public Health department is now housed in part of the east wing of the old O.P.D. Other minor alterations will be made in the Medical School building during the summer.

FINANCIAL STATEMENT. Thanks mainly to grants of \$6000, from the Rockefeller Foundation, and of \$14,000, from the China Foundation, to the Medical School, and the exercise of very careful economy, it is hoped that we shall reach the end of the year without a deficit in the Medical School itself. The Hospital receipts have shown a gratifying increase, so that the deficit on hospital account will probably not be more than \$7000. Though this result is gratifying, so far as it goes, it means that all departments of the Medical School have been running on skeleton budgets, and proper expansion has not been possible.

Efforts to raise an endowment fund have, so far, met with small success. \$11,000 has been collected in China. Dr. Shields has spent a year in America doing promotional work, so far with no very tangible results.

It is with very great gratitude that we record the renewal of the grants from the Rockefeller Foundation and the China Foundation for next year.

A special grant of G.\$3000, from the Women's Committee in America, towards the upkeep of the hospital during the ensuing year, should mean that the hospital will not need any grant from the Medical School. Even so, however, the budget for the next year shows a deficit of \$9,000. A permanent increase of at least \$20,000 over our present annual resources is urgently needed. We cannot rely on the continuation of the two emergency grants from the Rockefeller and China Foundations. Our Chinese staff is relatively underpaid and it should be our ideal to obtain on the field a sum of \$50,000 per annum to pay the salaries of 20 Chinese members of staff. If this were achieved, we might then appeal to the mission boards for further additions to our foreign staff, in order to bring the total number of staff up to 40. A staff of this size should be adequate to cover the work of the Medical, the enlarged hospital and the various outside activities in connection with Public Health.

Respectfully submitted,

(Signed) Peter C. King

Dean.

RECEIVED  
GENERAL  
OFFICE  
APR 10 1936

The new out-patient department was opened in September 1933, and the hospital during a few weeks later, and both are proving very satisfactory. The income from the increased out-patient department has not equalled the expenditure, but it is hoped that this will gradually improve until the hospital becomes self-supporting.

Dr. Lydie's term of office as Hospital Superintendent expired at the end of February, and as he did not wish to continue in this position for a further term of service, Dr. Lydie was appointed Superintendent for the period from March to December. A committee was appointed to bring in recommendations in regard to a permanent Hospital Superintendent.

Various alterations have been made in the old hospital and out-patient department, the pathology department having been moved to the westward ward of the old hospital, thus giving larger and more convenient accommodation for the Pathological Museum, whilst the Public Health department is now housed in part of the east wing of the old A. I. S. Other minor alterations will be made in the Medical School building during the summer.

The financial statement shows a surplus of £10,000, from the hospital foundation, and of £15,000 from the other sources. It is hoped that we shall reach the end of the year without a deficit in the Medical School itself. The hospital receipts have shown a gratifying increase, so that the deficit on hospital account will probably not be more than £7,000. Though this result is gratifying, so far as it goes, it means that all departments of the Medical School have been running on a deficit budget, and proper expansion has not been possible.

Efforts to raise an endowment fund have, so far, not been successful. £11,000 has been collected in Dublin, Dr. Lydie has spent a year in America being promotional work, so far with no very tangible results.

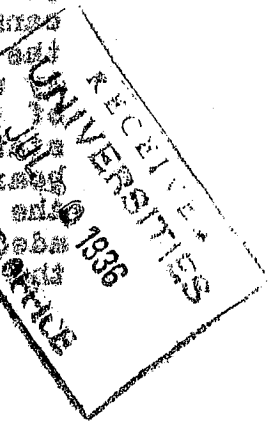

It is with very great gratitude that we record the renewal of the grants from the Rockefeller Foundation and the China Foundation for next year.

A special grant of £4,000 from the Women's Committee in America towards the upkeep of the hospital during the coming year, should mean that the hospital will not need any grant from the Medical School. Even so, however, the budget for the next year shows a deficit of £9,000. A permanent increase of at least £20,000 over our present annual resources is urgently needed. We cannot rely on the continuation of the two emergency grants from the Rockefeller and China Foundations. Our Chinese staff in relative numbers and it should be our ideal to obtain on the field a number of 30 Chinese members of the staff. It is to be hoped that we will be able to appeal to the Medical School for further assistance to our foreign staff, in order to bring the number of staff up to 40. A part of this extra should be added to cover the work of the Medical School enlarged hospital and the various outside activities in connection with the hospital.

Respectfully submitted,

(Signed) Peter G. Lydie

Dean

REPORT OF MRS. YUI, THE DEAN OF WOMEN AT CHEELOC UNIVERSITY

to the

STAKEHOLDERS

CHEELOC BOARD OF GOVERNORS AND THE WOMAN'S COMMITTEE

My return to the United States has been a very joyful one. It has been a great pleasure and privilege to meet old Cheeloc friends and to make new ones. I felt particularly grateful for the cordial invitation, which was extended by the Woman's Foreign Missionary Society of the United Church of Canada, to visit Canada for about a fortnight. The visit was very brief, but it was a very significant and joyful experience. I felt certain that the friendship between our colleagues of Canada and those of Cheeloc was deepened.

Dr. Forbes and Mrs. Forbes, who is the President of the W.F.M.S. of the United Church of Canada, visited the Cheeloc campus and saw the faithful work done by President Liu toward the unification and betterment of the University. After that visit, they had a greater enthusiasm for, and deeper interest in, Cheeloc.

I have been very happy that I have had the opportunity of meeting people prominent in every line of endeavor, among them church people, in North America. Lately, letters have been coming in from the Woman's Committee of England, extending me a cordial invitation to attend the meeting of the Woman's Committee in London, which is to be held on June 29; from the Oxford Conference on Church, Community and State; and from the Student Conference at Swinwick in the center of England. I am looking forward to meeting our British friends, and to attending these meetings with great anticipation.

My Impressions after Visiting North America

The six months I had traveled, doing promotional work for Cheeloc, was begun on September 14, 1933. The first area which we covered was in Boston. I was under the leadership of Mrs. F. B. Macmillan, through whose careful arrangement, guidance, and wise planning I was able to have the opportunity of speaking to many women students in the State of Massachusetts. I also had the opportunity of attending the Harvard Tercentenary Celebration, and of making several personal visits.

Cheeloc is not as well known as the other Christian Universities, and people are glad to learn of the work that is being done at Cheeloc. I am sure that a great future will be in store for Cheeloc if a local committee in the different leading cities I have visited - such as Boston, Detroit, and Chicago - can be organized for the support of the University.

In October, Miss Hilda Anderson and I went to Chicago, and had to make ourselves known. It was only through the aid of Mr. Paul Reynolds of the American Board, and President Robert Richards of Chicago University, that meetings were planned and persons interviewed. The last place was Detroit. Programs were arranged by Mr. George C. Aydelett, and my time was fully occupied.

My experience has shown me that Cheeloc is an unfamiliar name to many people in North America. This year's work, however, is not to reap but merely to sow seed, and show the necessity for intensive cultivation.

Recommendations

1. President Liu should visit America in the very near future. Even six months' intensive work will accomplish a great deal for Cheeloc.

2. Local committees should be organized in order to support Cheelee's promotional program.

Preparing Christian Women Leaders for Cheelee

In order to prepare Christian women leaders for Cheelee, to be added to the faculty staff in the future, the opportunity for advanced study abroad is necessary. This has been my hope and conviction for several years. I have three students in mind who, I hope, will come to N. A. in 1938-40. One will study household science in Toronto, another will do graduate work in biology in Michigan, and the third will take up religious education and homemaking.

In the past the Woman's Committee supported only medical women students. I hope in the future this Committee will see its way clear to give aid to all women students, as women leaders are needed in every phase of the life of China.

Special Graduate Study at the University of Michigan

I am spending the spring semester in graduate study in the following courses: "Mental Hygiene of Adolescence," "Educational Psychology," "Educational Sociology," "Child Development," and "English Argumentation." I also visited the progressive schools in Ann Arbor, Michigan.

*Received attached to 6/28/39 fr. Miss Fuller*

Report of the year 1938-1939 by Miss Josephine Fuller, Assistant to  
the Dean of Women, Cheeloo.

June 7th, 1939

Not knowing what normal, peaceful times in China might be and what a normal, full Cheeloo Campus is like, I consider this year of my first work in China as an interesting experimental year. Our student body has been small, but opportunities have opened up because of this very fact -- opportunities for other bits of work which in a normal year would have been pushed aside for lack of time. In reviewing the work of the year, I see some definite steps which have been taken toward advancement in peaceful, normal times.

I have greatly enjoyed this work, and look forward with great pleasure to another year of work at Cheeloo. But may I say here that what little has been done here with students this year was possible only because I was given the opportunity of language study in Peking last year -- a year when personal losses greatly outbalanced personal gains all over China. Mine was a definite gain. When I visited Cheeloo in September, 1937 just before the evacuation, the lack of language loomed up as a definite barrier between myself and the students with whom I was so eager to begin work. But the year in Peking has partially lowered that barrier. Living with the students in the dormitory this year has further lowered it. My living in Miner Hall with the women students has been a real opportunity for me. I have greatly enjoyed being with them and learning from them, praying with them, and helping to build a Christian home atmosphere with them. It has been a treat. I want to thank the administration for giving me this opportunity.

At first there were so many odd jobs offered to me which were to my liking that I could not decide what actually was my job. So a committee was appointed to help me arrange my time schedule in which work for the Dean of Women's office and Physical Education classes for women took the greater part. This committee consisted of Dr. Scott, Miss Wilson, and Miss Myers. The need for leaving free time to help the girls when they came for help was greatly stressed. This has been somewhat difficult but necessary for anyone living in the dormitory with the students.

The dormitory itself has been ably run by an advisory committee consisting of Dr. Witham, Miss Bell, and Miss Russell. This committee has carefully worked with the girls in planning for food, planning for the girls to clean their own rooms, do their own laundry, and to help one another in doing housework happily. The girls have cooperated very well and have enjoyed doing this work which, to some of them, has been a new experience. In planning the meals, one student has taken responsibility for a month at a time. They have taken great pride in getting the most for their money. In all this housekeeping work, Miss Russell has played a very important part, working it into their Home Economics course. The dormitory has been the laboratory for that course this year. Miss Bell leaves us on furlough this summer, and we shall miss her help in this work.

To set up rules for the women students and to discuss any matters of authority or matters of discipline, should occasion arise, a Dean of Women's Committee was appointed to act in the absence of our Dean

of Women. To this committee I have acted as assistant. The committee members were Dr. Scott, Dr. Gell, and Miss Myers. Simple rules were set up for Miner Hall for this year. Great stress was placed upon the rule stating that no woman student should leave the campus alone, and that each should sign up before leaving, state her destination, time of leaving, and time of return, and then check in upon return. This rule has been carefully obeyed all year, as have the other rules. This particular group of girls have cooperated in every way to make life pleasant and enjoyable in the dormitory.

Throughout the year the women students have held their own cottage prayer meetings for only quarter of an hour five times a week for the first semester and three times a week for the second semester. The girls have lead these meetings themselves most of the time, with faculty members and wives invited in on an average of about once a week to lead. The girls who have been taking piano lessons this year have played for the singing at these meetings and so have had this practice in hymn playing. The feeling of Christian fellowship and helping one another was greatly strengthened by this regular praying together for things close to all our hearts. During the winter vacation the men and women who remained on campus held prayer meetings together after eating their evening meal together each day. Again the students themselves took turns leading these meetings. Much has been gained through this.

Early in the year, need arose for teaching better health habits to the women students and student nurses. A health chart kept by each one to check up her own improvement was drawn up upon the written suggestions of all students in my Physical Education classes. This was tried for a month by us all; then criticized, revised, and printed to be passed around and checked monthly by all women students. Some noted improvement was seen and habits corrected. Also as part of the health work, a weekly weight chart was kept by all Miner Hall students throughout the year, after a set of idle scales was found in the health room at the Administration Building and moved to the Study Room on the second floor at Miner Hall. Slight losses were greater than gains, the heavier girls losing the greater number of pounds. The general health of these students this year has been very good. Wang Ju Yu had her appendix removed in December and Kao Chen Ying was ill for over a week. Other than these absences practically no school has been missed by the Theological students.

The recreation program for the year has been full, what with required work for the first year nurses and the rural training class and voluntary classes for Miner Hall students and upperclass nurses. (The Miner Hall Women include the Theological women, the Rural Training Class women, and the Pu Hsi Pan women.) A recreation room was found and fitted out for men students. They have taken a keen interest in this and have used it a great deal. During the winter vacation Miss Russell conceived the idea of inviting the men and women students then on campus -- those who were eating all three meals together in Miner Hall all vacation time (but at separate tables) -- to her home for several play nights. Three were held at her home and two at mine. From this grew the larger program of Game Nights held every two weeks in Room 333 of the Chemistry Building this spring. There were six of these all-student-faculty programs in the series. Dividing into groups of

from two to five, depending upon the type of program, the members of the Game Leadership Class of the Rural Training Class took charge of these nights, planning the program, choosing the games, and leading the games themselves, as rather a laboratory for the theory they had gained in class during the year. All the students and part of the faculty were invited by the leaders each time. Faculty wives took turns in providing the tea and cookies for this group of 50 to 60 each time. The faculty and the students seemed to enjoy this playing together and getting better acquainted through play.

This spring for several months Mr. and Mrs. Jim Scott opened their home to all Pu Hsi Pan students every Sunday evening for religious discussions, reviving the Friends of Christ group started at the time of Kagawa's visit here several years ago. The students took a great share of the responsibility for these evenings, and much Christian fellowship was felt within the group.

A very valuable piece of work has been done this year by Dr. Gault in getting together interesting information about Cheoloo women graduates (medical) and putting it into good form to be sent to the home boards for publicity purposes. Three such reports have been sent this year. In the first report sent was included a dozen snapshots of campus scenes and other interesting subjects, with the negatives of each for enlargement purposes. More student photographs have been sent later, with the hope that even more will be sent next year as they are needed. We hope this work will continue this next year, in spite of Dr. Gault's absence on furlough. In seeing what work our students are called upon to perform in such times as these, we can better prepare them to meet these special demands.

Various committees have been working throughout the year on plans for educating our women for life activities. Dr. Gault has headed this committee, with Miss Russell and Miss Brodie assisting. The plans drawn up and reported upon by this committee are to be tried next year, and put into more practicable and permanent form after the trial year. They need the cooperation of every student and faculty member.

The physical education program for this year has been full. These are the classes, number of students per class, <sup>per term</sup> hours of class per week, and sports taught to each class this year:

1. First year Nurses	19, 18, 15	3	Tennis, Basketball, Tap Dancing, Volleyball, Deck Tennis, Games
2. Upperclass Nurses	16, 16, 15	1	Tennis, Country Dancing, Volleyball, Games.
3. Theological Women	9, 9, 9	2	Tennis, Tap Dancing, Volleyball, Games.
4. Pu Hsi Pan Women	0 3, 2	2	Tap Dancing (then later combined with (3.))
5. Rural Training Class	16, 15, 14	2	Games and Game Leadership, Basketball, Baseball, Volleyball, Deck Tennis.

An interesting note is that attendance for both the required and voluntary classes have been almost the same, and that is between 90%-100%.

Uniforms for all the physical education classes were chosen by the students themselves, and were in most cases made by a tailor, tho in some cases the students themselves made them by hand. For the upper-class nurses, whose personal funds were very low, we tried buying the uniforms ourselves and renting them to the nurses at 10 cents per month. But this plan has not been successful, for the material and the making of them came to \$44.00 whereas the rent for the six months these girls used them was only \$9.00. Next year the rent will have to be even less. Perhaps some incoming girls next year will want to buy them and own them. They are a two-piece navy blue and white culotte set which the girls have been very satisfied with. The other students bought their own uniforms at the total cost of about \$4.00. Laundrying these uniforms between class periods has been a problem for the nurses. They have had to send them to the weekly laundry, thereby missing two or three class periods each time they were washed. We hope other plans can be made for next year.

One other experiment which I tried this year was teaching rhythm band and other rhythmic activities to the kindergarten group which met at the Winfield home twice a week for four months this spring. Chinese instruments ( of the very simple street-vendor type) were used by the 18 children, only 3 of which were foreign children. A small organ was lent by one of the Chinese mothers for the use of the group, and a portable victrola was used for certain types of rhythmic work. Almost all of the classes were held out-of-doors, except when the weather made this impossible. Due to many childhood diseases, the attendance was very poor.

The one main job in the Dean of Women's office this year has been to find all the scattered files belonging to the office and to get them together and into shape for regular use. Although much was found and put together, much has not been found, leaving many holes to be filled later as other files are found. Included in this work on the files has been the task of getting the current student files up to date, including the making of new blanks, and adding of snapshots of each student to the list of things in the file of each student. These current student files include:

- 1) Schedule of classes for each term.
- 2) General information data blank.
- 3) General health blanks.
- 4) Monthly health charts checked by the students.
- 5) Snapshot of the student.
- 6) Any letters or additional data or information concerning student.

A filing case for the Dean of Women's office has been secured, and the files are near completion and in order in this case.

The physical education work for the year was concluded with a Play Day on Saturday June 3rd to include not only students taking part, but also faculty and friends from the Settlement and the other missions in the city. The motto was "Enjoy Play by Playing." Participation and fun of play were stressed, not competition and winning. We might hope that this sort of thing will be repeated next year with

more careful planning and greater success and more students here to take part. The final Game Night of the series was held that same evening in the Chemistry Building. It took the form of a circus and side-show combination. Attendance was between 200 and 250 including students, faculty, friends, and servants and their families.

We look forward to more play and sports for students and faculty in these next few years. A more extensive program of faculty-student tournaments can be included. This year has been only an experiment on my part. Now I should know more what will be most suitable for <sup>the</sup> recreation program next year, and know more where the greatest need lies. I still think that the average Chinese student has not yet learned how to play and to play well and be a good sport about losing a game. He lacks skills and therefore the keen enjoyment which our students have in other countries. It will be a long-time program, but next year will be an important reconstruction year for China youth. And each year after that increasingly important.

This year the students, I may hope, have learned some few things from me, but I have learned far more.

Following are some recommendations I wish to make for next year:

- 1) That all nurses pay an athletic fee of from \$2.00 to \$4.00 per semester, to be used for athletic equipment and upkeep of that equipment, and for any other incidental expenses within the physical educational program for the nurses.

- 2) That the making of the students' play uniforms be made as a project of the Home Economics Class laboratory work, if possible.

- 3) That some arrangement be made for student nurses to do their own laundering of play uniforms.

- 4) That a shuffleboard court be built for the men and women students on the campus for next year.

- 5) That some indoor play space be provided for winter physical education classes when the weather does not permit outdoor play. Perhaps such both inside and outside the wall can be only very small and temporary, but some space should be provided for scheduled classes in physical education as ~~as~~ classrooms are provided for other classes.

- 6) That all Cheeloo University students of all departments, men and women, have required work in physical education for at least two years.

- 7) That a small fund be allocated for the use of beautifying the women's dormitories, such as buying suitable scrolls, flower vases, odd pieces of furniture, buying and laundering and of reception room linens, and other odd, but necessary things for the rooms used by all students.

- 8) That a bell system be installed for the proper use by guests calling at the dormitories, and that there be some arrangement made for either a student or servant to answer bells and call students.

more careful planning and greater success and more students here to take part. The final game night of the series was held last evening in the Chemistry Building. It took the form of a circus and address combination. Attendance was between 200 and 250 including students, faculty, friends, and parents and their families.

We look forward to more play and sports for students and faculty in these next few years. A more extensive program of faculty-student tournaments can be included. This year has been only an experiment on my part. Now I should know more what will be most suitable for recreation program next year, and know more where the greatest need lies. I still think that the average Chinese student has not yet learned how to play and to play well and be a good sport about losing a game. He lacks skills and therefore the keen enjoyment which our students have in other countries. It will be a long-time program, but next year will be an important reconstruction year for China youth. And each year after that increasingly important.

This year the students, I may hope, have learned some few things from me, but I have learned far more.

Following are some recommendations I wish to make for next year:

- 1) That all nurses pay an athletic fee of from \$2.00 to \$4.00 per semester, to be used for athletic equipment and upkeep of that equipment, and for any other incidental expenses within the physical educational program for the nurses.

- 7) That a small fund be allocated for the use of beautifying the women's dormitories, such as buying suitable scrolls, flower vases, oil pictures of landscape, buying and laundering and of reception room linens, and other odd but necessary things for the rooms used by all students.

- 8) That a bell system be installed for the proper use of guest calling of the dormitories, and that there be some arrangement made for either a student or servant to answer bells and call students.

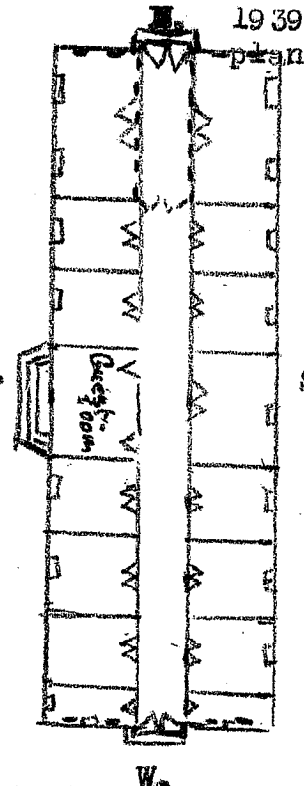

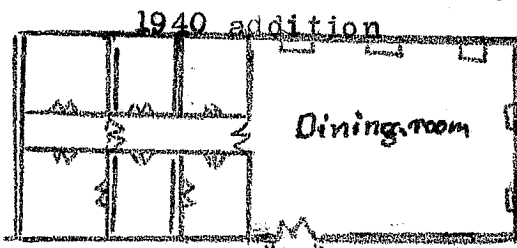

JAN. 1944

### CHEELOO WOMEN'S DORMITORY

The Women's Dormitory compound is surrounded by a bamboo fence, and is tucked away behind another compound where the University of Nanking has some faculty houses, but we have access to the main road by our own private lane. To reach it from the W.C.U.W. campus, we go out by the gate near the Library, turn to the right along the street past Goucher Junior Middle School on our left, till we reach the archway on the right with the inscription in Chinese "Cheeloo Women Students Mei Te Chai" (Miner Hall)

The original building was erected in the summer of 1939, with funds donated by Dr. H. H. Kung in memory of Dr. Luella Miner. With the sum of N.C. \$20,000 a straight double line of cubicles, with a dining-room at one end, was built of "pi-t'ou" ( $\frac{1}{2}$ " thick lath and plaster), with a tile roof, containing a dozen bedrooms about 12' x 13 $\frac{1}{2}$ ' x 12', and a small entrance room which serves as a students' guest-room - the ground plan is something like this, but architectural accuracy is not guaranteed.

In 1940 an annexe was built, containing a larger dining-room and six small rooms (including the Dean's suite), the whole forming the foot of an L at the dining-room end (East): the corridor in the main block was then continued through the original dining-room, by putting up partitions, making two freshman dormitories. A covered cemented pathway leads across the narrow courtyard to the dining-room annexe. All is, of course of similar construction - pi-t'ou with tile roof. Prices had, however, gone up in the interval, and this small addition cost us \$12,500, with an extra \$5,000 for a gate-house, fence etc.

Windows are just open lattice, covered with paper when the rain does not wash it off. The floors of corridors are of limed mud, the bedrooms and dining-room are boarded.

I spent a couple of hours the other afternoon in a tour of this dormitory, poking my nose into all sorts of rooms, under the guidance of Mrs. Yui, measuring, asking questions, and getting some real facts about the way our women students live under war-time conditions in Chengtu. We started with Mrs. Yui's rooms. Hua-hsin is now a big girl now and one room is her bed-room, often shared with some guest or temporary patient. Mrs. Yui's room is across the corridor, and there is a door at this end of the corridor in an attempt to secure a little privacy. Mrs. Yui's bedroom has a communicating door with her guest-room, and that again opens into the corridor. Next on the west side is a little room which used to be Mrs. Yui's office but has now been given up to a senior medical student with T.B. and a woman doctor who graduated a year or two ago and is now mentally unbalanced. She has no relatives within reach, so for months Mrs. Yui has been looking after her.

JAN. 1944

- 2 -

On the east side of this short corridor are two other bedrooms, one shared by the physical education teacher and an assistant in the Chinese Department, and the other occupied by four clinical clerks. These rooms average 12' x 11' (All rooms are about 12' in height). The corridor opens into the dining-room, which is a room about 44' long x 30' wide, with its entrance opposite the east door of the dormitory block. It has 17 tables (square), each seating 8 girls. It has three open lattices on the east, two on the south and two on the west, besides its outside and inside door-ways which are never closed, so fresh air is one of the things of which we have abundance. Just inside the door is a wooden stand where the huge wooden tub of hot rice is placed at meal-times for each student to help herself. Since the increase in the incidence of T.B., each girl has her own bowl and chopsticks, and after the meal she takes them out to a bucket in the yard and washes them herself by pouring boiling water over them. Before the price of flour rose so high there used to be an occasional "treat" for the northerners of steamed wheaten bread, but now they cannot afford this.

The kitchen, (behind the dormitory block at the east end), has a large brick stove along one side, with one fire-hole inside the room for boiling a pan of vegetables, but the stoking for the main stove is done from outside. There are three big coppers, one for rice, one for boiling drinking water and one for bath water. The three cooks supply food for 150 persons three times a day. "Breakfast consists of soft rice or other cereal with a little salted vegetable. The other two meals are of "dry" rice, with four small bowls of vegetable for each table - i.e. for eight persons." Breakfast is at 6.30, dinner at 12 and supper at 5.30. // Usually the Kitchen Committee looks after the food. I visited the dormitory in examination week and Mrs. Yui was doing the catering, and to assist the intellectual strain extra money (was being allowed) for a meat meal each day. / The average cost per day just now is about \$900 to \$1000 for vegetable (including meat) and 3½ tou of rice per diem which we are able to buy at the government price of \$136 per tou. (The market price of rice varies from \$600 to \$800 per tou these days). The coal for the cooking is stored in baskets in a fenced enclosure beside the kitchen, that for bath-water is in a separate enclosure. // In the winter each girl has a bath once a week, instead of twice as in summer, as they like some hot water for washing hands and faces in the cold weather. (A servant carries a bucket of hot water to the bath cubicles, which have cemented floors and a tile roof, but are more or less open to the weather. The used water can be let out into a gully in the cement floor. [Altogether there are seven bath cubicles, each with its shallow wooden tub.] Ours is the only one of the Associated Universities where the women students do all their own laundry, including bed-linen. This is all done with cold water in a bench outside the wash-room. // I watched the water being drawn for this. A man goes up a short steep ladder, plants his feet firmly on two stone piers, pulls up the bucket from the well full, turns the water into a stone basin, whence it runs along a bamboo pipe to a large tub at the end of the laundry bench, then he lets the bucket down into the well again. I have not reckoned up how many times he has to do this each day to fill the needs of cooking, drinking, washing, bathing, laundry and cleaning for 150 people. The clothes-lines in the narrow yard between the

JAN. 1944

W.D.

- 2 -

service-block and the dormitory-block are always full. In the wash-room are wooden stands with holes for 16 basins. Each girl brings her own from her bedroom, where it is kept under the bed. The freshmen have an outside wash-stand near the dining-room. All the waste water runs into a drain along the side of the dormitory and so out to the big drain under the main roadway. Until last year this was quite open in its course across our site and the Nanking University residence site till it reached the road. Mrs. Yui, by much personal supervision managed last year to get it properly bricked over.

Now let us intrude into one or two of the students' bedrooms. The first one is a freshman dormitory (part of the original dining-room). Here live and sleep and study fourteen girls in seven double-decker wooden beds - good hiding-places and breeding-places for bed-bugs in the warm weather and only constant vigilance keeps them under. The room is about  $13\frac{1}{2}' \times 24'$  - two of the regular "chien". It has two lattice windows on the north side and two lattice fan-lights at the east end and one over the door into the corridor. There are four wooden tables (each  $5\frac{1}{2}' \times 2'$ ) placed in the centre and a few wooden stools, and there is a narrow wooden shelf over each bed, rather like the little shelf above a berth in a ship's cabin. No cupboards of any kind. There were two vases of flowers in this room, and in some others, and remains of Christmas and New Year decorations. The students supply their own bedding of course and in many cases the gay covers of the wadded "comforts" folded at the foot of the bed supply a colourful note in the otherwise bleak rooms. Of this particular group of fourteen, four are from Hopei, two from Kwangtung, two from Shantung, and one each from Szechuan, Hunan, Chekiang, Kiangsu, Hupeh and Honan. Seven are in Medicine, five in Science and two in Arts.

Further along the corridor we knock at the door of one of the ordinary rooms <sup>are</sup>  $13\frac{1}{2}' \times 12'$ . Here are eight young women in their double-decker beds, with enamel wash-basins and tooth-mugs stowed in various places. (I noticed one fur coat hanging on a string at the end of the bed, and other garments on hangers hooked over the slats at the bottom of one of the upper bunks. The occupants were as varied as in the freshman dormitory - two Hopei, two Szechuan, and one each from Fukien, Kwangtung, Shantung and Hupeh, and divided among Medicine, Arts and Pharmacy.) Two tables fill up the space between the two rows of beds and there are two hanging electric light bulbs (25 watt). The snag is that the electricity is cut off about three nights a week, owing to the overloading of the city electric light plant. Then the students try to study by the light of locally-made candles or vegetable oil lamps. The Dean on those occasions has a trying time going around the dormitories to see that no candle-studying is being done in the beds - only the dining-room may be used on these occasions. FIRE is her ever-present nightmare.

JAN. 1944

At the end of the corridor to the west are two smaller rooms. One of these is now set aside as a partial isolation room for light T.B. cases. There were three of these and one non-T.B. student here: one case is a 6th year medical and two are 3rd year. The room opposite is a box-room, piled high with suit-cases and other luggage.

The toilet arrangements are primitive - a round house with seven cubicles in a corner of the yard near the bath-house, emptied periodically by the night-soil man. The chief difficulty is training the students to shut covers and doors.

The dormitory ~~is~~ (including the Dean) employs five servants (apart from the cooks who are paid by the Kitchen Committee) - a gateman, a night-watchman, two coolies, and one woman, who is the wife of the gateman and has a bonnie baby which is being brought up hygienically under Mrs. Yui's training and supervision. One servant's room near the gatehouse has been pressed into service as a students' bedroom, and three girls occupy this tiny cupboard of a room, with a curtain across the open doorway during the day-time to screen them from passers-by.

The small yard - 30' x 154' - in front of the main entrance, has been turned into quite a pleasant garden by Mrs. Yui's unremitting labours and gifts of plants from the gardens of friends, but it is too small even to sit in, and there is no place for athletics. The narrow court (16' x 82') between the original block and the annex is partly cemented and here there is a set of parallel bars, but there is otherwise no place for the girls to take exercise. Their physical drill and athletics must be carried out over at the men's dormitory.

I have forgotten the students' guest-room - perhaps it is best forgotten for it is just a drab entrance with one rickety round table and five equally rickety chairs, one of them backless, but usually during free daylight hours a student or two will be seen here entertaining a boy-friend with conversation and peanuts.

It is a far cry from the pleasant amenities of Tsinan, but it is part of our share of the stresses of a world at war, and most of us seem to keep wonderfully cheerful through it all.

Jan. 1944.

*Mr. Corbett*

CHEELOO UNIVERSITY

REPORT OF THE DEAN OF WOMEN

For the year ending June 30, 1944

I. Student Body:

The 156 women students in Cheeloo University during the year under review were divided among the departments as follows:

Chinese Department	10		
History and Sociology	16		
Political Science and Economics	40		
Physics	2	Totals:	Arts 66
Chemistry	8		Science 39
Biology	10		Medicine 51
Pharmacy	19		<u>156</u>
Medicine	51		

Of these, only 132 could be accommodated in the women's dormitory, so that 24 women students were living outside, thus constituting a serious problem in administration and discipline, not to speak of the loss to the students themselves in being separated from the corporate life and extra-curricular activities of their fellow-students.

Of the women students, 58 were professing Christians.

At the end of June, 26 women graduated, 16 from the Arts College, 5 from the Science College and 5 from the College of Medicine. Of the Arts graduates, 8 are now teaching in high schools, 2 are working in the Y.W.C.A., 2 are in banks and one in the Finance Bureau, while two are engaged in Child Welfare work, one in Yen-ching University and one in Kunming. Of the Science graduates, two are working in the laboratory of the Central University Hospital in this city, one is in a factory and two are teaching science in high schools. All the medical graduates are working in Szechuan Province, one in our own University hospital, one in the Central University Hospital, one in rural public health work and two in private hospitals.

II. Health Problems:

Since many friends in the west have sent funds to help students suffering from tuberculosis and for student aid in other ways, it is necessary to say something to explain why we have had to appeal for such funds.

The cost of living has increased so rapidly and persistently for the past few years that each student has had to pay a board fee increasing as follows:

Autumn 1942	\$ 800
Spring 1943	1,000
Autumn 1943	2,000
Spring 1944	3,500

Some help was given by the Welfare Department of the Ministry of Education. Previously this applied to all schools but now it is given to students of Medicine and Science only and only to 70% of these in private schools. The amount thus cared for is also only about 70% of the board. This has worked particularly hard for Cheeloo as a refugee institution with a large percentage of its students coming from occupied areas, so that they were unable to receive any funds at all from their families and friends. It was therefore necessary to help all such students with 30% of their food fees and other students with the whole amount. Actually the Welfare Committee managed to provide \$30,000 during the year to help the twenty-six girls who were without

resources. This food fee includes besides the actual cost of food, the wages of the cooks and helpers and the cost of fuel. It is therefore difficult to obtain a sufficient and balanced diet in spite of the high fee, although the kitchen committee is given careful advice about purchasing. The regular allowance of meat is 5 pounds a day for 150 people. Sometimes, by very careful management, the Committee can save enough to buy a little extra meat two or three times during the month.

The money collected by Dr. Morgan was originally intended to supplement this meager diet, but it was found that spread over the whole number of women students nothing really effective was accomplished and it was impossible to distinguish between those who could themselves afford to buy extra food and those who could not. It was therefore decided to limit this fund to certain groups of students, adding to it the sums contributed by friends in the States through Dr. A. V. Scott. The total amount was placed under the control of a Committee for Student Welfare, of which the Dean of Women is the Chairman, and the money has been used as follows:

a. Care of T.B. Students. Five of these recovered their health during the year and are now doing full work, but three are still in hospital and needing much financial help. One is a sixth-year medical student from a good Christian home in Shantung, another is in second-year medicine, and the third is a first-year biology student who has been suffering from T.B. for three years. These all come from occupied areas and can receive no financial aid from their homes. Each of them has cost us \$10,000 a month, though they are also receiving help from other student relief funds.

b. Care of Undernourished Students. Such students must first have a fluoroscopic examination by Dr. T. C. Greene and then present a signed recommendation from a doctor with an order for special diet. By this use of some of this money in preventive work, we hope to avoid cases of T.B. in future.

### III. Extra-curricular activities:

a. Departmental Clubs. Each department has its own club, supervised by one of the professors. They have regular meetings when problems are discussed, but most of their activities are social, particularly at the beginning and end of the school year when faculty and students are welcomed or farewelled, which occasions are usually celebrated by the playing of modern drama or Chinese opera.

b. Social service activities. Every girl in the dormitory takes her turn at least once or twice during the term in teaching a class composed of the dormitory servants. Beginning at 7 p.m., the dining-room becomes a school-room, part of it is used for the students own home study, but in one corner is the servants' class. Altogether there are nine servants - three cooks, six other men, and a woman who has a year-old baby. The woman has not succeeded in learning a great deal of reading, writing or arithmetic, but the men have made quite a lot of progress since they have been with us. One of the younger ones can now read simple books and the newspapers, and is now starting to learn English! Books and pencils are provided by the Self-government Society.

Six girls also take part in helping with the teaching in the Nantai Primary School in singing, Chinese literature and other subjects. This is the seventh year that our women students have helped with this school.

Sick-visiting has been another activity. Those who have been engaged in this have visited five of our own students, four of them girls in a hospital near the West Gate, about four miles away, and one fourth-year medical student - a man - who has been in hospital for three years. This visiting is done on Sundays as a

rule, mostly by Christian students who take fruit, cakes and other gifts, especially at Christmas and other festivals, both to these special students and to other sick folk. They tell stories, read the Bible and sing hymns and these visits are greatly welcomed both by our own students and those of other universities.

c. Choral Society. There are 57 members altogether of whom 26 are girls. For several years it was directed by Dr. H. C. Meng, who is now doing post-graduate work in the United States. The Choral Society has quite a reputation in and around Chengtu. They have raised quite a large amount of money for their less fortunate fellow-students, and during the year handed over \$70,000 to the Student Welfare Committee as the proceeds of concerts, etc., given by the Choral Society.

On July 4th, with the approval of the President, the Dean of Women took a group of 26 girls and 6 men students to one of the air-fields to entertain the officers and men at this particular base. Their entertainment, which included popular American songs, was greatly appreciated by the men of the A.A.F. and the students themselves had a very enjoyable day.

#### IV. Athletics:

Physical Education is taught by Miss C. W. Huang, who is a graduate of Central University. Basket-ball is the favorite ball game among the girls. They have played in more than half-a-dozen intercollege meets, Medical School against Arts and Science, or Science against Arts, etc. Most of the good players among the girls are from Bridgman Academy in Peiping.

All except those with a doctor's certificate of exemption take part in some games or sports. Baseball is another favorite and volley-ball is also popular. The chief difficulty is that we have no playground for the girls, so that they must always go to the men's playground for their practice, which is sometimes very inconvenient.

During the spring term at the inter-universities Athletic Meet in the Public Park, our Cheeloo girls formed a "cheer group" to cheer not only for Cheeloo, but for the good players in other Universities. Their enthusiasm was much appreciated, as well as their splendid organization.

#### V. Dormitory Administration and Problems:

Owing to the high cost of labor it has been impossible to do very much toward improving the dormitory building. The previous summer a day's wage for a laborer (carpenter or mason) was \$80, but this summer it was \$250. Most materials also had gone up five or six times in cost. Only essential repairs were therefore done, such as white-washing the bedrooms, dining-hall, and bathrooms, and repairing the wooden beds, many of which are falling to pieces. We also had a small room by the gate, previously used as a store for the students' food, changed into a guest-room for the girls. Originally the guest-room was inside our small compound, which had serious disadvantages. That room is now a reading-room for our own students and the Dean's kitchen has been turned into a store.

The total cost of these things was very high, but there are many other repairs and improvements which ought to be made if we only had the funds available, ear-marked for that purpose. As it is the actual money spent has simply been drawn from the University pool, as it has been found impossible under present circumstances either to make a budget or to have the books kept with separate accounts.

The running of the dormitory is done through the Students Self-government Society with its sub-committees and the Kitchen Committee and its sub-committees. Both these organizations have their own officers and hold regular meetings once a month, at which the Dean of Women is present as supervisor. They give excellent opportunities for training the students and giving them useful experience in self-government and dormitory affairs, and in directing and helping new students. The Kitchen Committee, with advice from the Dean, does the planning of the meals, making daily menus for a balanced diet, distribution of daily supplies, and payment of wages to the cooks and kitchen helpers.

One very serious problem is the lack of fluid capital for the laying in of stocks of supplies when the market is favorable. The following table of the costs of staple articles, showing the difference between the prices in the summer and after the autumn term began, will emphasize the necessity for such a fund:

<u>Commodity</u>	<u>Cost in July</u>	<u>Cost in Sept.-Nov.</u>
Coal - 2 tons	\$70,000	\$140,000
Kindling - 50 bundles	4,800	9,500
Oil - 800 cattles (used for cooking & lighting)	72,000	106,000
Flour - 1 bag (44 lbs.)	1,800	2,450
Rice (spec. gov. price for one term)	200,000	400,000

The total cost of running the dormitory for one term, including the food, except the daily vegetables, was \$490,800.

#### VI. Women Staff:

Besides the Dean of Women, the Chinese women on the staff during the past year have been as follows:

Dr. Lin Lien-ch'ing spends most of her time in the hospital in the city, only coming out occasionally to the University hospital on the campus. She lives in the city with her mother and other members of the family.

Dr. Luan Ju-lien works in the new university hospital on the campus and lives in the hospital.

Both of these doctors are always ready to give advice regarding health problems among the women students.

Mrs. Tang, the wife of the President, is carrying a full teaching load in the English Department. She lives with her family south of the campus.

Miss Shih Yun-shan also taught full-time in the English Department during the greater part of the year under review.

Miss C. Y. Wei, an assistant in the Chinese Department, and Miss C. W. Huang the physical education teacher, both live in the dormitory, sharing a room, but having no dormitory responsibilities.

Of Western women on the staff, only Miss Hickson was here during the whole of the year: Miss Ann Deens was head of the English Department until she left suddenly to return to England at the end of 1943.

VII. Religious Activities:

Student Christian Fellowship. The Fellowship holds a regular meeting once a week. A number of the girls are members, one of them was vice-chairman of the Fellowship, but only about a dozen of the girls attend the meeting.

Church Attendance. On Sundays about twenty or thirty girls attend one or other of the church services on the campus, while ten or more go to their own churches in the city. The individuals vary from week to week and probably there are not more than a dozen girls who attend church regularly every Sunday.

SHANTUNG CHRISTIAN UNIVERSITY

Report of Registrar

see Shantung  
6/14-15/28  
May

MAY 1928

SHANTUNG

Two chief matters of importance are to be reported for the year. The first is the large falling off in the enrollment in the School of Arts and Science, and the second is the correlated program for Christian Higher Education in China with its statistical findings and its effects on the University. The latter is largely treated in another report.

With regard to the first, it should be understood that the problem appears in the School of Arts and Science alone, - probably because it is nearer to the sources of student supply and thus more affected by civil war, heavy taxation, and general unrest. The enrollments of the other Schools show only a slight decrease - Medicine 90 to 89, and Theology 37 to 35-. The enrollment in Arts and Science dropped from 258 in 1926 to 163 in 1927. A fairer basis of comparison is with the year 1925 when the enrollment in Arts and Science was 193. [The usual figures for the 1925 are 244, but as this includes the sub-freshman class of 51, it is deducted for purposes of comparison. - ]

Table I. Enrollment in School of Arts and Science

	1926	1927
Senior	23	20
Junior	19	25
Sophomore	56	35
Freshman	70	22
Pre-Medic, 2nd Yr.	26	20
Pre-Medic, 1st Yr.	49	20
Pre-Theology	0	5
	<u>258</u>	<u>163</u>

This loss of 95 students is 36% of the roll of 1926. The chief loss is in the first year of Pre-Medicine and in the first and second years of Arts and Science. While the total loss of students is 36% of the roll of 1926, that for women is only 18% and that for men is 39%. The decrease is slightly greater among non-Christian than among Christian students, as the roll for 1926 shows 87% of the students Christian, while that for 1927 shows 90%.

Table II. Sources of Students for whole University

Fukien dropped from	28	to	14	-
Honan " "	17	"	7	-
Hupah " "	15	"	8	-
Kiangsu " "	26	"	15	-
Shansi " "	35	"	24	-
Shantung " "	104	"	138	-
Shantung " "	12	"	10	-
Manchuria " "	15	"	12	-
Chihli, increased "	42	"	44	-

The largest percentage decrease comes in Fukien, Honan, and Hupah, while the largest numerical decrease comes in Shantung. It is to be noted that the decrease due to conditions in Shantung is only 27% of the total, indicating that local conditions are not the only or chief cause of the decrease.

## Reg. Report - 2.

The slight decreases for Kwangtung and Manchuria are interesting. The gain from Chihli is doubtless partly due to the registration of Yenching.

Table III. Mission relations of students for whole University

	1926	1927	Decrease
American Presbyterian Mission N.	107	76	29%
Methodist Episcopal	44	29	34
American Board	43	37	14
English Baptist	30	31	0
Church of England	19	17	10
American Presbyterian S.	13	4	69
Southern Baptist	13	7	46
Lutheran United	14	8	42
China Inland	8	3	
Seelays	6	2	
English Presbyterian	5	1	
United Church of Canada	4	1	
London Missionary Society	6	10	
United Free Church of Scotland	7	4	
Swedish Mission	4	2	
7 other missions	2	4	
Chinese Churches	6	13	
Non-Christians	47	35	25

The largest numerical loss is in the American Presbyterian Mission North, which is probably due to the fact that most of the students of this mission come from Shantung, where the largest loss among the provinces occurred.

This decrease in enrollment appears in the statistics for student and class work. In the School of Arts and Science, the total number of student hours - i.e. the total number of hours all the students spent in classes per week - decreased from 5117 in 1926 to 4173 in 1927, -31%. On the other hand, the total number of teaching hours - i.e. the total hours taught by all the teachers per week - decreased from 316 in 1926 to 310 in 1927, -2%. The difference between 31% and 2% is largely due to the inflexibility of organization which does not permit of a radical decrease in courses offered after the term has been started and it becomes apparent that the enrollment is to be smaller. More important, however, are the standards for a School of Arts and Science which do not permit of a considerable decrease in classes taught no matter what the enrollment. The resolution of the Senate - No. 1009, Nov. 28, 1927 - explains this position:

"Moreover, since only 25% of the total number of hours taken by an Arts student is entirely elective, while 47% is rigidly required and 28% is semi-required in the sense that the student has to take certain courses after he has chosen his major, . . . ., we are of the opinion that the present percentage of electives is not in any sense excessive. Furthermore, what is an elective for one student is usually a required course for another in his major.

"Since there are few electives open to the student body which are not required of students majoring in certain departments, any serious reduction in the number of so-called elective courses would so reduce the required work in several departments as to take away their standing, and place the Arts School below the standard as to number of departments that has been set for China. If this standard is not reached, the School of Arts and Science ceases to be a Senior College."

The findings of the Council of Christian Higher Education in China throw considerable further light on this problem of staff versus enrollment. A brief statement of these findings as regards standards and as regards the rank of Sheelee among the Christian colleges in China will make the situation clearer.

The Council, which is setting standards for China on the basis of extensive studies in the West, considers 200 students to be a minimum unit enrollment in Arts and Science. According to their figures it takes as large a staff to handle 100 as 200, and as many to handle 275 as 400. This unit is considered most economical both from the teaching point of view and the financial. Therefore the Council is advising colleges in China to adopt as their immediate goal for enrollment some multiple of these units. This University will probably adopt 200 - 1 unit as its goal for the next five years. Pre-Medicine is not included in these figures. The Council considers that 100 students is an acceptable standard here and that the present effective staff of 8 in Pre-Medicine is adequate for that enrollment. Administrative officers and assistants are not to be included in the list of teaching staff members. On the basis of 12 students to 1 teacher, 200 students require 15 teachers. At present in the School of Arts and Science, we have 15 teachers. Besides these 15 we have 7 on the roll, of whom 3 are administrative officers in the University and do almost no teaching and 4 are absent with their return improbable. As long as we wish to meet the standards for China, we are compelled to have a staff of 15. Any reduction below this number is at the risk of academic standards. The real problem - provided we really wish to continue the school - is to increase the number of Arts and Science students from the roll of 177 in 1926 or 103 in 1927 to an effective 200.

The Council attempted a careful rating of the 10 colleges in China. 3 colleges received a rating of -A-. We received a rating of -B-. The rating is based on figures from the colleges for 1925-26 and includes 12 separate items on which ratings were made. We received a rating of -A- on the following items: 1. Requirements for Admission, 2. Requirements for graduation, 3. Size of Faculty, 4. Percent of faculty giving full time, 5. Teaching load of the Faculty, 10. Laboratory equipment, 11. Separation of Middle School, 12. Total enrollment, 13. Percent of enrollment in the upper division. We received a rating of -B- on the following items: 7. Size of classes - we had 3 classes over 40-, 9. Library appropriation - it is only 3% of the total-. We received a rating of -C- on 10. 5 Training of Faculty. Item 5 is the only serious count against us.

Table IV. Graduate Training of Staff of School of Arts and Science

	1925		1927	
	foreign	Chinese	foreign	Chinese
Having 0 yrs. of grad. study	2	12	2	11
Having 1 yr. of grad. study	4	1	2	2
Having 2 yrs. of grad. study	2	1	0	3
Having 3 yrs. of grad. study	7	3	8	3

The foreign staff ranks with that of other colleges in China and with the minimum standard of colleges in the West. The Chinese staff is decidedly below standard and drags the whole school down. It is suggested that our low enrollment and also our lack of leadership in the province are both due in large measure to this fact.

Respectfully submitted,

H. F. Smith  
Registrar

**SHANTUNG**  
**REGISTRAR'S OFFICE REPORT**

For the Year ending June 1931.

To the Board of Directors,  
Cheeloo University,

Ladies and Gentlemen:-

The past year will be remembered as one during which the enrolment of the students in the Colleges of Arts and Science fell to a figure lower than that for many years past. It should however also be remembered for the recovery and reopening of these Colleges, despite considerable handicaps. The enrolment for the Arts and Science Colleges was 55 and 74 respectively in the autumn term, the number of freshmen being only 13 and 35 respectively. For this several reasons can be given, namely rumoured doubts as to the possibility of these Colleges being able to reopen, difficulties of communication due to military operations last summer, uncertainty as to prolonged maintenance of peace in Tsinan and district, the late publication of the new Entrance Regulations, and the abolition, under these regulations, of the system of admitting students recommended by accredited schools without examination. It should be noticed that, despite the fewness of ~~applicants~~ applicants for admission, the Entrance Board of these Colleges did not accept an exceptionally high proportion of the candidates. This is made clear in the table below:-

	<u>Arts</u>	<u>Science</u>
Candidates taking the Entrance Exam.		
Accepted .....	7	31
Failed and therefore refused	4	14

Another indication that standards have not been allowed to drop despite a natural desire to have a larger number of students is that, of the 22 students in the first year of the Pre-medical course, 4 were dropped for poor work at the end of the autumn term.

The Medical College enrolment shows an increase of 3 on last year, the entering class numbering 19 students, all but one of whom had been studying the pre-medical course offered by the Science College.

In the spring term of this year the enrolment of the Medical College remained unchanged, that of the Arts College also unchanged, the number of new students being equal to that of graduates in January, while the Science College showed an increase of one. The discrepancy between the figures of the Nursing School for the two terms is explained by the fact that the 11 in the fifth year in the autumn were graduates who have since obtained positions. The enrolment of the Pharmacy School and of the Laboratory Technicians Class have remained the same throughout the year, being 12 and 4 respectively.

The total enrolment of the three Colleges in the autumn was 220, of whom 197 (89.5%) are professing Christians. Including the Pharmacy and Nursing Schools and Technicians Class the total number was 282, of whom 255 (91%) are Christians.

Graduates. In January of this year four students graduated from the Arts College and one from the Science College. The following table indicated the number expected to graduate this summer (June):-

	<u>Arts</u>	<u>Science</u>	<u>Medicine</u>	<u>Pharmacy</u>	<u>Nursing</u>
Men	4	4	7	12	-
Women	-	2	1	-	11
Totals	4	6	8	12	11

New Catalogues. This year has been the issue of a new Medical ~~College~~ College Catalogue in English and one in Chinese is now in preparation; also of a short Prospectus of the Pharmacy School, and of a new Chinese Catalogue of the Colleges of Arts and Science. An outline English Catalogue of the Arts and Science Colleges is now being printed.

The Pharmacy School regulations require that applicants for admission to that School should sit the ordinary entrance examination of the Science College (which remains the same as last year) with the exception that graduates of recognised nursing schools may be exempted from examination in certain subjects.

The new Arts and Science Colleges regulations differ from previous ones mainly in the larger number (138) of credits required for graduation, the General requirements consisting in the main of fundamental first year courses, one for each College, and the increased requirement for Major Subjects, this being, in some cases, as much as double the past requirements. The new Catalogue contains full details of the Courses offered by each Department, these being very greatly extended in most cases, and details of the four-year course of study required of students in each Department.

The future. There are 25 students who will complete the Pre-medical Course in the Science College this June, and it appears likely that 3 students from other universities will also sit the Entrance examination of the Medical College. If a good proportion of these succeed in the entrance examination, the Medical College enrolment in the autumn will probably be over 100.

The Pharmacy School hopes to admit 16 students by examination this summer.

The outlook for the Arts and Science Colleges is much brighter than a year ago. Last year by the last week in May something under 200 sets of application blanks had been asked for.

1931

3

while this year the figure is over 600. In contrast to 1930 an encouraging feature of the situation is the large number of candidates for the Entrance Examination from Mission Schools outside Shantung. In addition to the nine regular examination centres outside Shantung, there will be other, this July, arranged for the special convenience of middle schools providing a suitable number of candidates.

May 30th 1931.

## STUDENT STATISTICS SHANTUNG CHRISTIAN UNIVERSITY

Oct. 15th, 1931  
Compiled by W. F. Fu

FORM I

### ENROLLMENT BY YEARS

- Notes. 1. "Enrollment" should show the total number of students on the roll on October 15th for the fall term and on March 15th for spring.  
2. All students should be counted, excepting auditors and visitors. Students who left before the date given above; but whose fees have been retained, should be included.  
3. Special students should be counted in the year above the highest year for which they have completed the entire year's work.

## FORM III. (2) CHRISTIAN STUDENTS

Note. 1. Church members include all who have been baptized or, in the case of those baptized in infancy, who have been confirmed or who have in some other way definitely allied themselves with the church, and are on the roll of a church. 2. Professing Christians include those who, while not members of the church, have openly professed their adherence to the Christian faith. 3. Under the heading "Arts" include all who are grouped above under "Arts", "Science", and "Education". 4. "Mem", means member of a Church/ "Prof.", means a professing Christian but not a church member, "Non-Ch" means a Non-Christian, "H. Chr", means from a Christian Home with at least one parent or guardian a Christian, "Jn. L. Yr." means joined the church last year. 5. In medicine, the first two years are Pre-Medicine. 6. In Theology, the first year is Pre-Theology.

## FORM IV. Source of student Body (2) By Provinces

Note 1. In view of the uncertainty attached in Chinese to the term "home address", each student should be counted twice, under the province which is his ancestral home and under the province in which the parent or guardian lives. This last is sometimes recorded as the "address to which the student's report goes".

## FORM IV. Source of Student Body (3) By Schools

Note. 1. In every case enter students under the type of school from which they graduated. 2. "Col. M.S." refers to the middle school conducted by Cheeloo. Graduates of other college middle schools should be entered under "Other Christian" or "Other Private" as the case may be. 3. Under "Other private" enter also students who studied at home. 4. "Arts" 5. "Medicine"

## REGISTRAR'S OFFICE REPORT

For the year ending June 1932

To the Board of Directors:-

### TOTAL NUMBER OF STUDENTS

- The total number of students in the fall of 1931 was 366, of whom 253 were

men and 113 women. Divided among the schools the figures were as follows:-

Arts	98
Science	103
Medicine	106
Pharmacy	18
Nursing	41

In the spring semester 1932 the total number of students was 354, of whom 249 were men and 105 women, divided as follows:-

Arts	94
Science	97
Medicine	106
Pharmacy	17
Nursing	40

### CANDIDATES FOR ENTRANCE EXAMINATION

- The total number of candidates taking

the Entrance examination was as follows:-

	<u>Arts</u>	<u>Science</u>	<u>Medicine</u>
Candidates	49	111	9
Accepted	23	46	5

The total number of students in 1st year medicine was 22, 17 of whom completed the regular Pre-medical course in the School of Science with a satisfactory percentage, and were allowed to enter the Medical School without examination. The candidates for the medical entrance examination were 9, four of whom were from other schools and five from our own.

### STUDENTS ACCEPTED BY TRANSFER AND SPECIAL STUDENTS.

- Two students were received into

the 2nd year Arts course by transfer from other schools, and 12 special students were received into the 1st year Arts course. (These special students who were accepted without regular examination can become regular students if they pass the entrance examination within one year. From the beginning of 1932, however, no further special students will be accepted). In the College of Science one student was accepted by transfer into the 2nd year course, four freshmen from other schools, and seven special students.

PART-TIME STUDENTS - In the fall of 1931 the College of Arts accepted 29 part-time students, and the College of Science 8. In the spring of 1932 the College of Arts accepted 7 new part-time students but twelve of those enrolled in the autumn did not return.

NUMBER OF CHRISTIAN STUDENTS - Of the total number of students in the fall term 1931, viz. 325 (excluding nurses) 271 were Christians, that is, 83 per cent.

GRADUATING CLASSES OF 1932 - The students who are expected to graduate in the summer of 1932 are as follows:-

	Men	Women	Total
College of Arts	8	3	11
" " Science	2		2
" " Medicine	16	5	21
School of Nursing		6	6
<hr/>			
Totals	26	14	40

PUBLICATIONS - For the Schools of Arts and Science there have been printed 1500 copies of regulations for candidates, and 1500 copies of the catalogue, both in Chinese. For the School of Medicine 500 copies of the Catalogue in Chinese and 500 in English have been published.

TEMPORARY REGULATIONS REGARDING RECOMMENDATION OF STUDENTS FROM SENIOR MIDDLE SCHOOLS - Two years ago the University abolished the practice of receiving students by recommendation from senior Middle Schools. This year, however, on account of requirements in other schools, the Executive Council decided to renew some of the old rules and continue to recognise some of the Senior Middle Schools which were formerly acknowledged by the University, and in addition senior schools which are already registered with the Government. Students recommended by these schools will be accepted on trial for one year and the results noted. Such recommended students will not however be entirely exempted from examination. A special examination in Chinese and English must be passed, particulars of which are contained in a separate sheet. The Schools which have applied anew and are recognized by the University as qualified to recommend students for consideration are as follows:-

Hui Wen Middle School, Peiping		
Pei Nan	"	"
Yu Ying Ku	"	"
Chung Shih	"	"
Mu Cheng	"	"
Chung Teh	"	"
Lu Ho	"	Tunghsien
Hui Wen	"	Tientsin
Chung Si	"	"
Ming Hsien	"	Taikuhsien
Ming Yi	"	Penyang
Po Wen	"	Wuchang

STUDENTS' AND GRADUATES' RECORDS - In accordance with Regulation No. 8 of the Board of

Education all privately established schools which are registered with the government must have first, a list of students, secondly, detailed records for each year of study including the year of graduation, thirdly, each student must have a copy of his records and his diploma, with a recent photograph attached, sent to the Ministry of Education for recognition. As these various procedures will take a considerable period of time, we have first concentrated on completing the records of the 34 students who will graduate from the Colleges of Arts, Science and Medicine this year, together with their diplomas before coming to the university, and also a list of the names of 23 students in the Colleges of Arts, Science and Medicine who graduated in 1931, with their school records and diplomas. These have been sent to the Ministry of Education with the application for permission to graduate. We are now busily working on the records of the students in the different years, and those of old graduates.

Respectfully submitted,

(Signed) W.F. FU.

## REGISTRAR'S OFFICE REPORT

1932 - 1933

To the Board of Directors:-

TOTAL NUMBER OF STUDENTS - The total number of students in the fall of 1932 was 459 of whom 321 were men and 138 women. Divided among the schools the figures were as follows:-

	<u>Men</u>	<u>Women</u>
Arts	98	41
Science	131	26
Medicine	82	16
Pharmacy	14	3
Technicians	4	
Massage	2	3
Nursing		49
<b>Totals</b>	<b>321</b>	<b>138</b>

In the spring semester of 1933 the total number of students was 446, of whom 307 were men and 139 women, divided as follows:-

	<u>Men</u>	<u>Women</u>
Arts	89	44
Science	116	24
Medicine	83	16
Pharmacy	14	3
Technicians	4	
Massage	2	3
Nursing		49
<b>Totals</b>	<b>307</b>	<b>139</b>

ENTRANCE EXAMINATIONS - The total number of candidates taking the Entrance Examination was as follows:-

	<u>Arts</u>	<u>Science</u>	<u>Medicine</u>
Candidates	119	234	5
Accepted	53	69	4

The total number of students in 1st year medicine was 15, 8 of whom completed the regular pre-medical course in the School of Science with a satisfactory percentage, and were allowed to enter the Medical School without examination. One graduated from Soochow College, Soochow and one one graduated from Wheaton College U.S.A. were allowed to enter the 1st year class without examination. One coming from a hospital in Shensi was allowed to enter the first year as a special student. The candidates for the medical entrance examination were 5, three of whom were from other colleges and two from our School of Science.

**STUDENTS ACCEPTED BY TRANSFER** - Two students were received into the second year of the Arts College by transfer from other colleges. One was received into the second year Pre-Medicine in the Science College by transfer from Nankai University, Tientsin, and three were received into the second semester of the first year Pre-Medicine by transfer from the Catholic University, Peiping.

**STUDENTS FROM UNREGISTERED SCHOOLS** - One student in Arts and two in Science who came from middle schools not registered with the government but who passed the entrance examination were temporarily received. They will be treated as regular students, but they cannot receive diplomas sealed by the Ministry of Education when they graduate from the University.

**STUDENTS TEMPORARILY TRANSFERRED** - There were three women students who applied for transfer into our University temporarily from other universities at Peiping on account of the situation. One from the China University was received into the first year Arts, and two from the National Women's College of Arts and Science were received into the second year Arts. They are both reckoned as temporary transfer students and not regular students.

**PART-TIME STUDENTS** - In the fall of 1932 the School of Arts accepted 46 part-time students, and the School of Science 9. In the spring of 1933 the School of Arts accepted 9 new part-time students and the School of Science 5.

**STUDENTS LEAVING SCHOOL** - In the fall of 1932 eleven students in the Arts College did not return by their own desire, and one because of poor work. Three students in the Science College did not return by their own desire, twelve because of poor work and two on account of illness. In the spring of 1933 three Arts students left on account of illness, and twelve part-time students did not return by their own desire. Three Science students left school on account of illness, five by their own desire, and three because of poor work. One part-time student did not return by his own desire and two on account of poor work.

**LOSS OF STUDENTS BY DEATH** - In July 1932 one 5th year Medical student, Mr. Liu An-tung, died after a long illness. In December 1932 one second year Arts student, Mr. Li Hsueh-ching died as a result of illness, and in May 1933 one first year Science student, Miss Jen Kuo-tung died of tuberculosis.

**CHRISTIAN STUDENTS** - Of the total number of students in the fall term 1932, viz. 401 (excluding Technicians, Massage and Nurses) 315 were Christians, that is 77 per cent.

**ACCREDITED MIDDLE SCHOOLS** - The results of recommending students from twelve senior

middle schools recognized by the University last year have been satisfactory. The Faculties of Arts & Science have therefore passed a regulation continuing during next year the recommendation of students from those twelve accredited senior middle schools, and also adding for next year only the trial following three middle schools which have applied for recognition as accredited schools:-

Feng Luen Middle School, Tangshan  
 Pei Ching Middle School, Canton  
 Hwai Si Middle School, Hwai Yuan

**PUBLICATIONS** - The Catalogues of each of the Colleges published last year remain valid so new ones were not published this year. 5,000 copies of the Entrance regulations of the Colleges of Arts and Science have been published this year.

**RECOGNITION BY THE MINISTRY** - Last June the records and diplomas of 23 graduated of 1931 and 34 students of the graduating class of 1932 were sent to the Ministry of Education for recognition according to the Regulations passed last June and August. Recognition was granted by the Ministry and the diplomas of the 1931 class were sealed and sent back at the end of August 1932, and the diplomas of the 1932 class, which were sent later, were sealed and returned in September 1932. In October 1932 full records of the regular students in the three colleges with their diplomas before coming to the University, were sent to the Ministry of Education for recognition. The document of the Ministry of Education was received by the University in March 1933.

**GRADUATING CLASS OF 1933** - The student who are expected to graduate in the summer of 1933 are as follows:-

	Men	Women	Total
College of Arts	5	2	7
College of Science	3	1	4
College of Medicine	25	3	28
School of Pharmacy	14	3	17
School of Nursing		5	5
<b>Total</b>	<b>52</b>	<b>14</b>	<b>66</b>

The records of each year and name lists of the above 44 regular students (excluding Pharmacy and Nursing) were sent to the Ministry of Education for Recognition through the Board of Education of Chantung at the end of April 1933.

REGISTRAR'S OFFICE REPORT

June 30, 1934

June, 1934

To the Board of Directors and the Board of Governors.

ENROLLMENT - The total number of students in the fall of 1933 was 542, of whom 368 were men and 174 women. Divided among the schools the numbers were as follows:-

	<u>Men</u>	<u>Women</u>
Arts	124	48
Science (including pre-medicine)	138	36
Medicine	73	19
Pharmacy	14	7
Short Radio Course	11	1
Technicians	5	-
Massage & Electro-therapy	3	3
Nursing	-	60
<b>Totals</b>	<b>368</b>	<b>174</b>

For the spring semester 1934 the total number of students was 502, of whom 345 were men and 157 women, divided as follows:-

	<u>Men</u>	<u>Women</u>
Arts	117	45
Science (including pre-medicine)	127	34
Medicine	72	19
Pharmacy	14	7
Short Radio Course	11	-
Technicians	4	-
Nursing	-	52
<b>Totals</b>	<b>345</b>	<b>157</b>

CANDIDATES FOR ENTRANCE EXAMINATION - The total number of candidates taking the entrance examination was as follows:-

	<u>Arts</u>	<u>Science</u>	<u>Medicine</u>
Candidates	106	272	16 (4 ours, 12 others)
Accepted	58	97	9 (4 ours, 5 others)

The total number of students admitted to the first year of Medicine was 22 (though only 20 actually took the course), 13 of whom completed the regular Pre-medical course in the College of Science with a satisfactory percentage, and were allowed to enter the College of Medicine without examination.

STUDENTS ACCEPTED BY TRANSFER - There were five students accepted as second year students in the Colleges of Arts and Science by transfer from other colleges:-

Arts	3
Science	1
Pre-medicine	1

FORMER STUDENTS RETURNED - In the fall semester of 1933 there were eight former students who returned to resume their course, namely, six sophomores in Arts, one sophomore in Science and one fifth year student in Medicine. In the spring semester of 1934 five former students returned, one in each year in Arts and one sophomore in Science.

PART TIME STUDENTS - In the fall semester of 1933 the College of Arts admitted 42 part-time students, and the College of Science 13. In the spring semester of 1934 the College of Arts admitted 9 new part-time students and the College of Science 5.

STUDENTS DROPPED OUT - In the fall semester of 1933 there were 8 students in the Arts College who voluntarily did not return, one because of poor work, one for financial reasons and one transferred to another College. In the Science College nine students voluntarily did not return, 4 because of poor work, 5 on account of illness and one for financial reasons. In the spring semester of 1934, 4 students of the Arts College did not return on account of illness and ~~one for financial reasons~~ 21 part-time students did not wish to return, 8 students in the Science College did not wish to return, one because of bad conduct, two from financial reasons, two on account of illness and one transferred to another college. Three part-time students did not wish to return.

CHRISTIAN STUDENTS - Of the total number of students in the spring semester 1934, viz. 446 (excluding Technicians, Massage and Nursing) 296 were Christians, that is, 66 per cent.

ACCREDITED SCHOOLS - The results of having students recommended from sixteen accredited senior middle schools have proved satisfactory, the faculties of the Colleges of Arts and Science have therefore voted that this regulation continue in force for those schools, and added to the list of accredited schools, on trial for one year only, the following three senior middle schools which have applied for recognition:-

If the nurses and technicians included in the enrolment on the first page are taken into account, the percentage of Christian students is raised to 71.

1934

Cheeloo Middle School, Tsinan  
Kuangwen Middle School, Weihsien  
Ts'ung Tz'u Middle School, Peiping

PUBLICATIONS - Three thousand copies of the Entrance Regulations for the Arts and Science Colleges have been published during the year.

GRADUATING CLASS OF 1934 - The students who are expected to graduate this summer are as follows:-

	<u>Men</u>	<u>Women</u>	<u>Total</u>
Arts	11	2	13
Science	13	1	14
Medicine	11	3	14
Nursing	—	6	6
<hr/>			
Totals	35	12	47

The names of the above regular college students (excluding nurses) together with their records for four years, have been sent to the Ministry of Education at the beginning of April for recognition through the Board of Education of the Shantung Provincial Government. According to the regulations of the Ministry of Education the final examination for the graduating class of any college must be given by a Graduation Examination Committee, which is composed of the president, professors, associate professors of the college and other well-known persons outside the college. The president is chairman of this committee. The names of the members of this Committee must be sent to the Ministry of Education for approval before the graduation examination. This year in accordance with this regulation we have already sent the names of the members of the Graduation Examination Committee to the Ministry for approval. The Committee is composed of the Acting President, Deans, Director of Studies of the Medical College, the heads of each department in the Colleges of Arts and Science, and four other persons invited from outside the University.
